

# Coffee Certification Data Report 2020

Rainforest Alliance and UTZ programs

May 2021

# Introduction

The main goal of this report is to present the scope and scale of the Rainforest Alliance and UTZ coffee certification programs in 2020 – calendar year. The report is created to inform our stakeholders and is part of our commitment to transparency.

The report focuses on the key indicators related to:

- **Market uptake:** sales of Rainforest Alliance Certified and UTZ certified coffee;
- **Program reach:** estimated Rainforest Alliance Certified and UTZ certified coffee production, premiums being paid and multi-certification.

This report is part of the Rainforest Alliance monitoring and evaluation system. Most of the data in this report is collected via our online Certification and Traceability systems.

We do our best to ensure that all the information in this report is accurate and reliable. As much of the data is collected by third parties, we are aware that there may be some shortcomings.

# Summary

In 2020, both the Rainforest Alliance and the UTZ certification programs continued with the growth trend we saw in the previous year, with respect to most of the relevant indicators. Estimated certified production volume, the number of farmers, certified area (ha), and global producer sales all reported increases in both certification programs.

The Rainforest Alliance and UTZ program demonstrate a similar growth when it comes to certified estimated production volume; 14% in the UTZ and 15% in the Rainforest Alliance certification program.

As for the sales of certified products, the UTZ certification program reports a growth of 20%, compared to 2% in the Rainforest Alliance certification program, resulting in a supply and demand ratio of 57% for UTZ and 52% for the Rainforest Alliance program.

Putting these numbers in a more historical context we can conclude that the UTZ certification program has increased 94% in sales since 2017, whereas the Rainforest Alliance program has increased 44% since 2017.

# Geographical program reach

The Rainforest Alliance and UTZ coffee programs reach farmers and workers in 28 countries worldwide.

## Program reach

In 2020, the estimated certified production area increased by 10% compared to 2019. Growth is shown in all regions but particularly driven by an increase in Africa (+18%).

### Area (hectare)

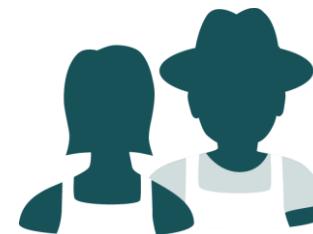

In 2020, the estimated certified volume increased by 15% compared to 2019, with most increases (in MT) coming from Latin America. Africa saw a 24% growth, while estimated volume in Asia Pacific decreased by 4%. The top 3 producing countries are: Brazil, Colombia and Ethiopia.

### Estimated production (MT)

In 2020, the number of farmers increased by 18% vs. 2019. The positive trend is shown across all regions; Africa (+17%), Latin America (+15%), and Asia Pacific (+34). Numbers have more than tripled in Tanzania and Uganda.

### Number of farmers

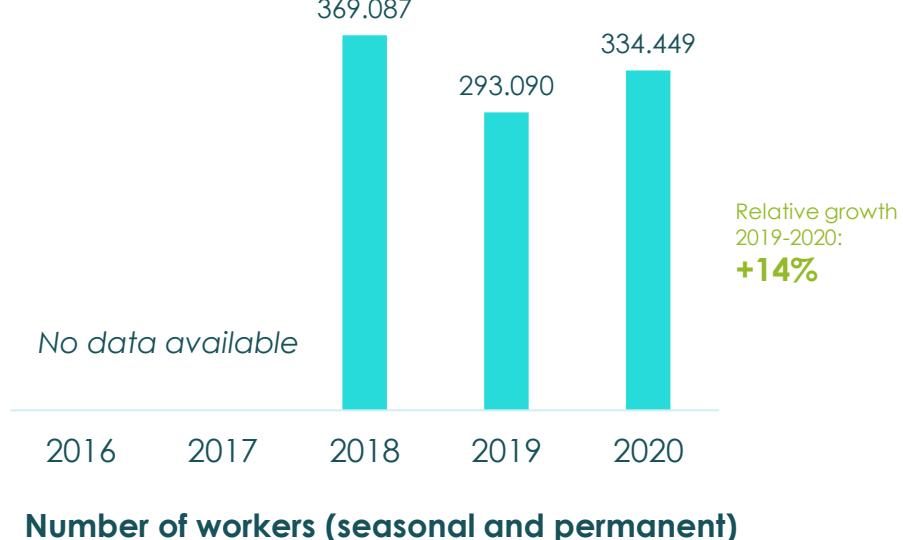

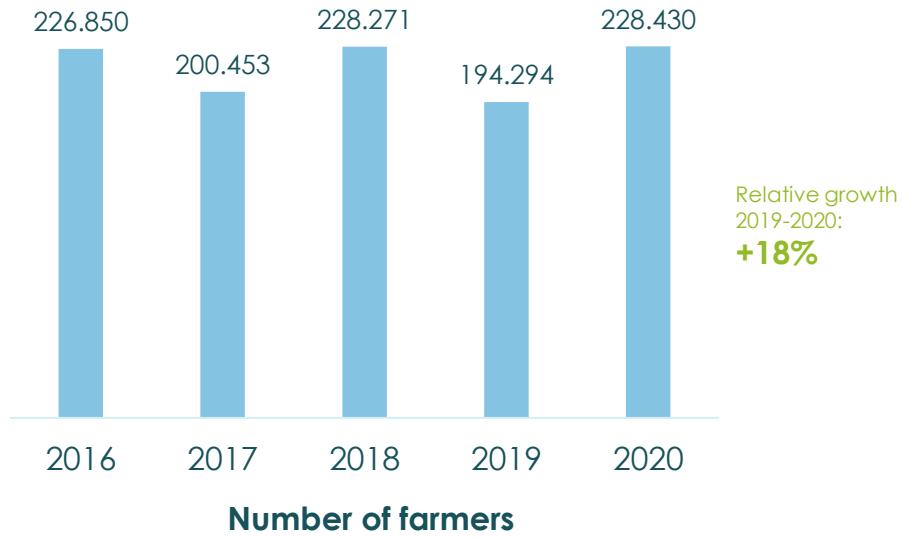

In 2020, despite COVID-19, the number of workers increased by 14% vs. 2019, with strong growth in Latin America (+23%), and to a lesser extent in Africa (+12%), and Asia Pacific (+13%). This can be explained by more certificate holders and more production volume which increased the demand for labor.

### Number of workers (seasonal and permanent)

# Program reach

# Global sales

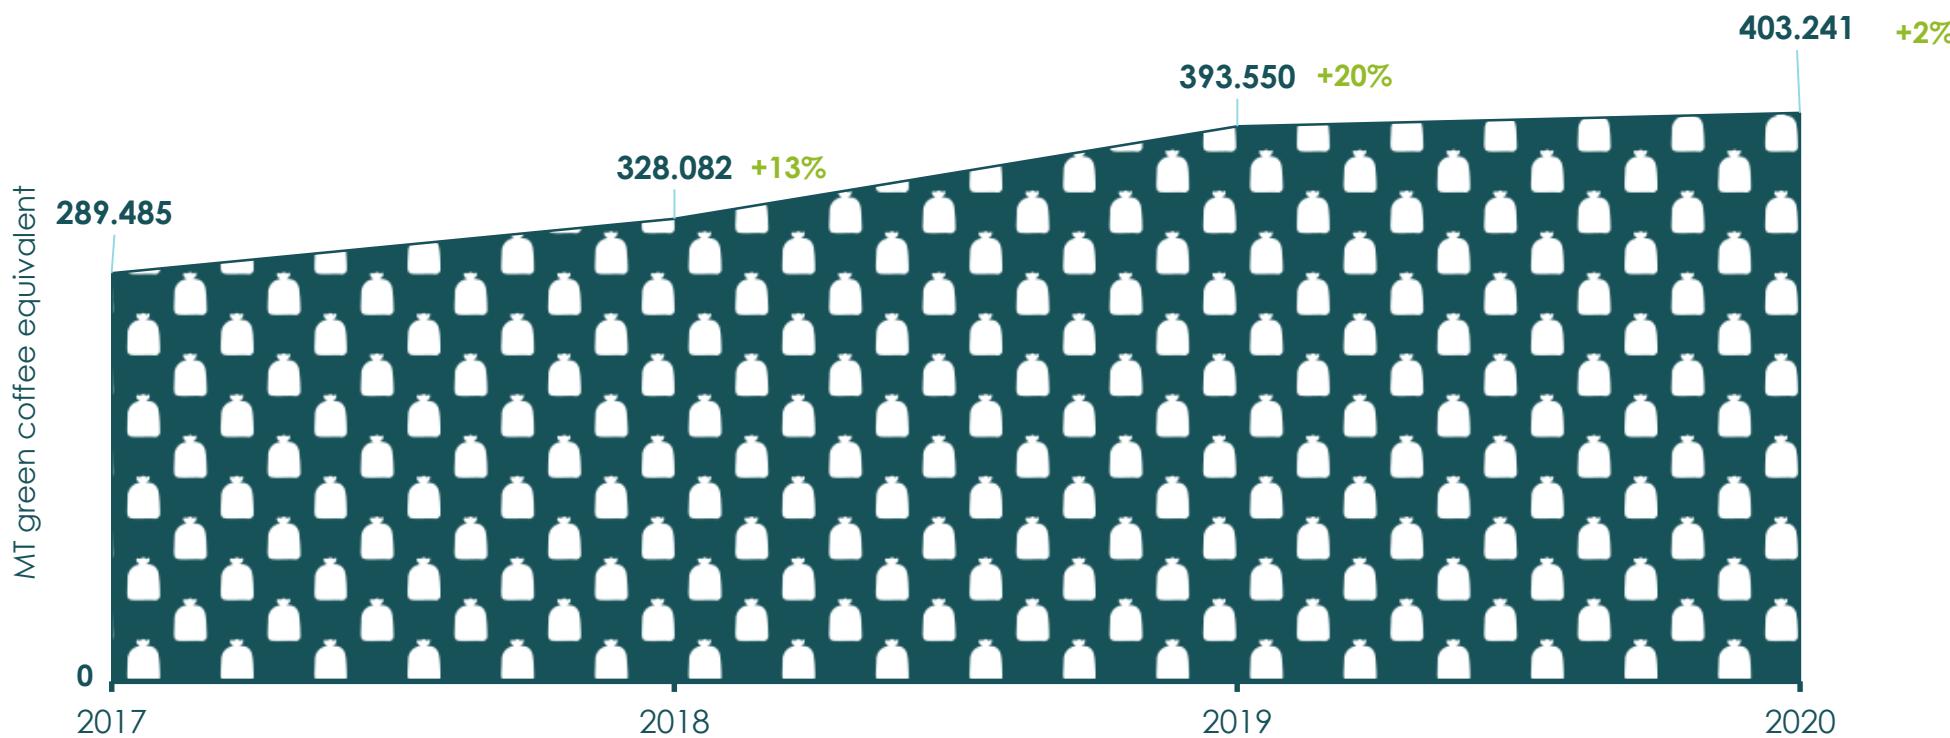

# Global coffee sales

The global Rainforest Alliance coffee sales remained stable with a slight increase of 2%.

Most coffee sales came from Brazil, Colombia, and Guatemala.

Coffee Certification Data Report 2020  
Rainforest Alliance program

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

# Global sales per origin

The global sales increase of 2% is reflected across all regions; Africa (+3 %), Asia Pacific (+2%), and Latin America (+2%).

There were mixed sales trends within the regions, with sales decrease from certain countries and more coffee sold from producers in others.

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

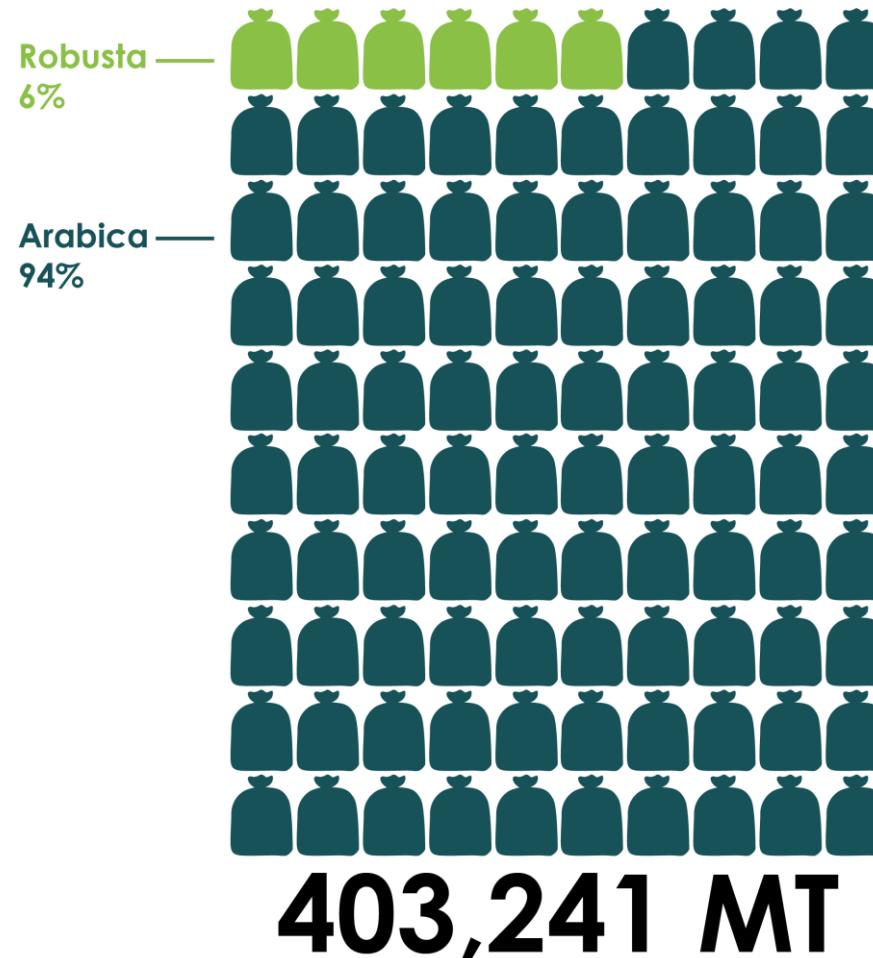

# Global sales per origin

Most Rainforest Alliance Certified coffee was sold from producers in Brazil (42% of global sales), Colombia (20%), and Guatemala (7%).

## Global sales – Arabica / Robusta

Arabica sales makes up 94% of all global coffee sales.

Global Robusta sales makes up 6% of total coffee sales.

Coffee Certification Data Report 2020  
Rainforest Alliance program

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

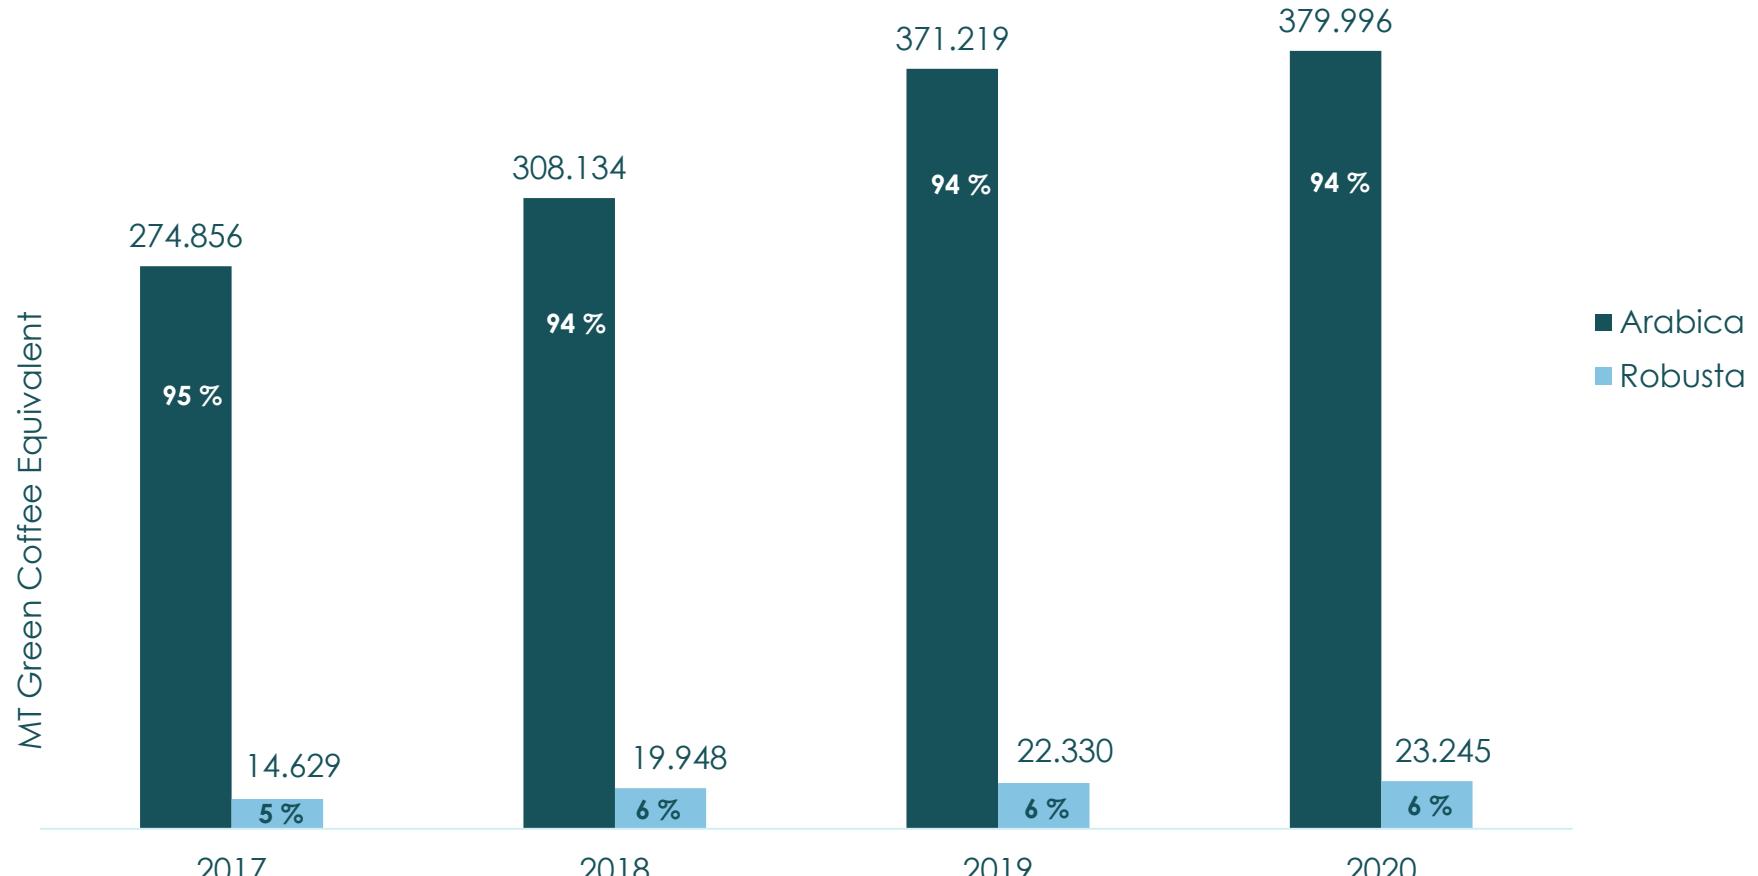

Arabica sales increased slightly by 1% vs. 2019 to 379,996 MT, driven by coffee sold from Latin America and Africa.

Robusta sales increased by 4% to 23,245 MT, due to growth in sales from Vietnam and Nicaragua.

The Arabica/Robusta ratio has been stable since 2017.

Coffee Certification Data Report 2020  
Rainforest Alliance program

# Global sales - split Arabica and Robusta

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

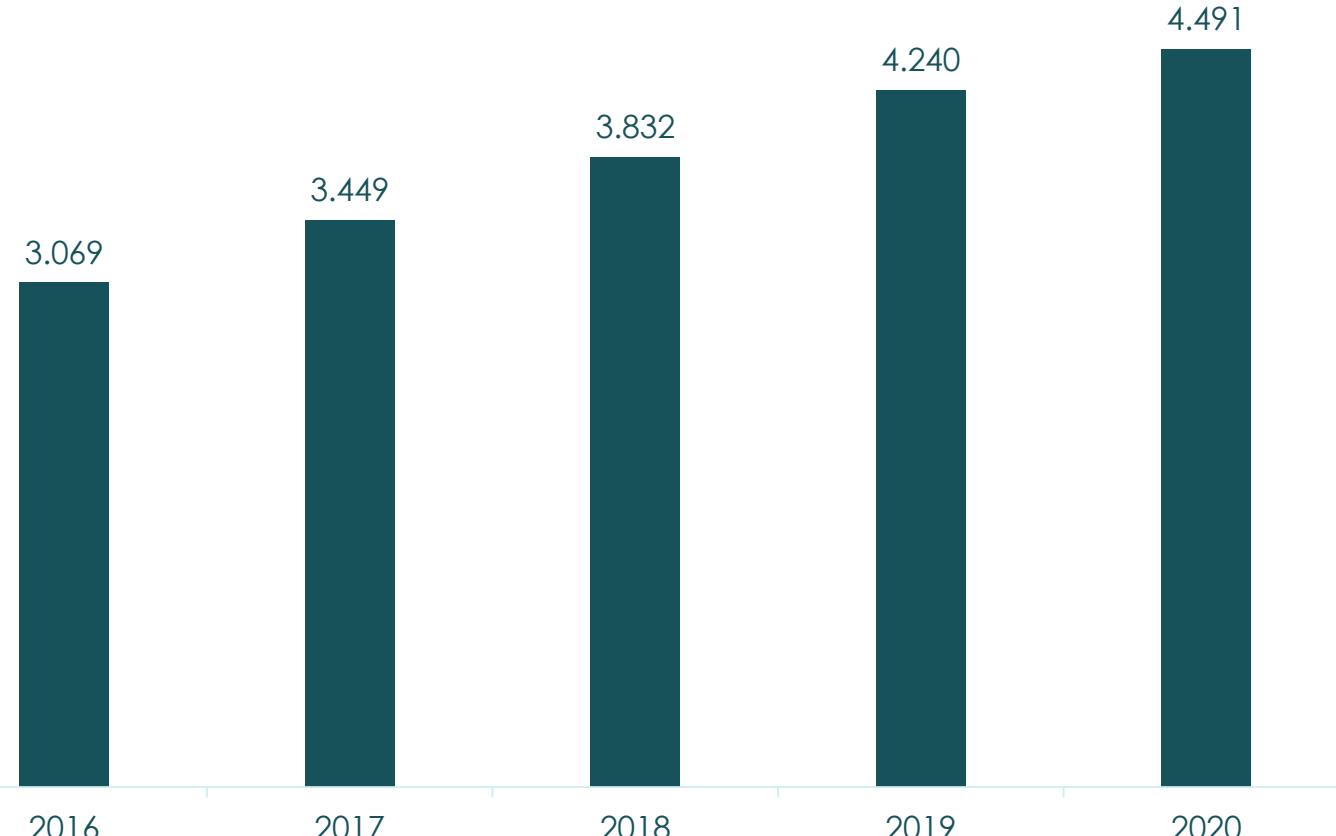

# Registered supply chain actors

In 2020, the number of supply chain actors within the program increased by 6%.

All regions show an increase; Asia Pacific (+12%), Europe (+9%), Africa (+4%), Latin America (+2%), and North America (+2%).

Coffee Certification Data Report 2020  
Rainforest Alliance program

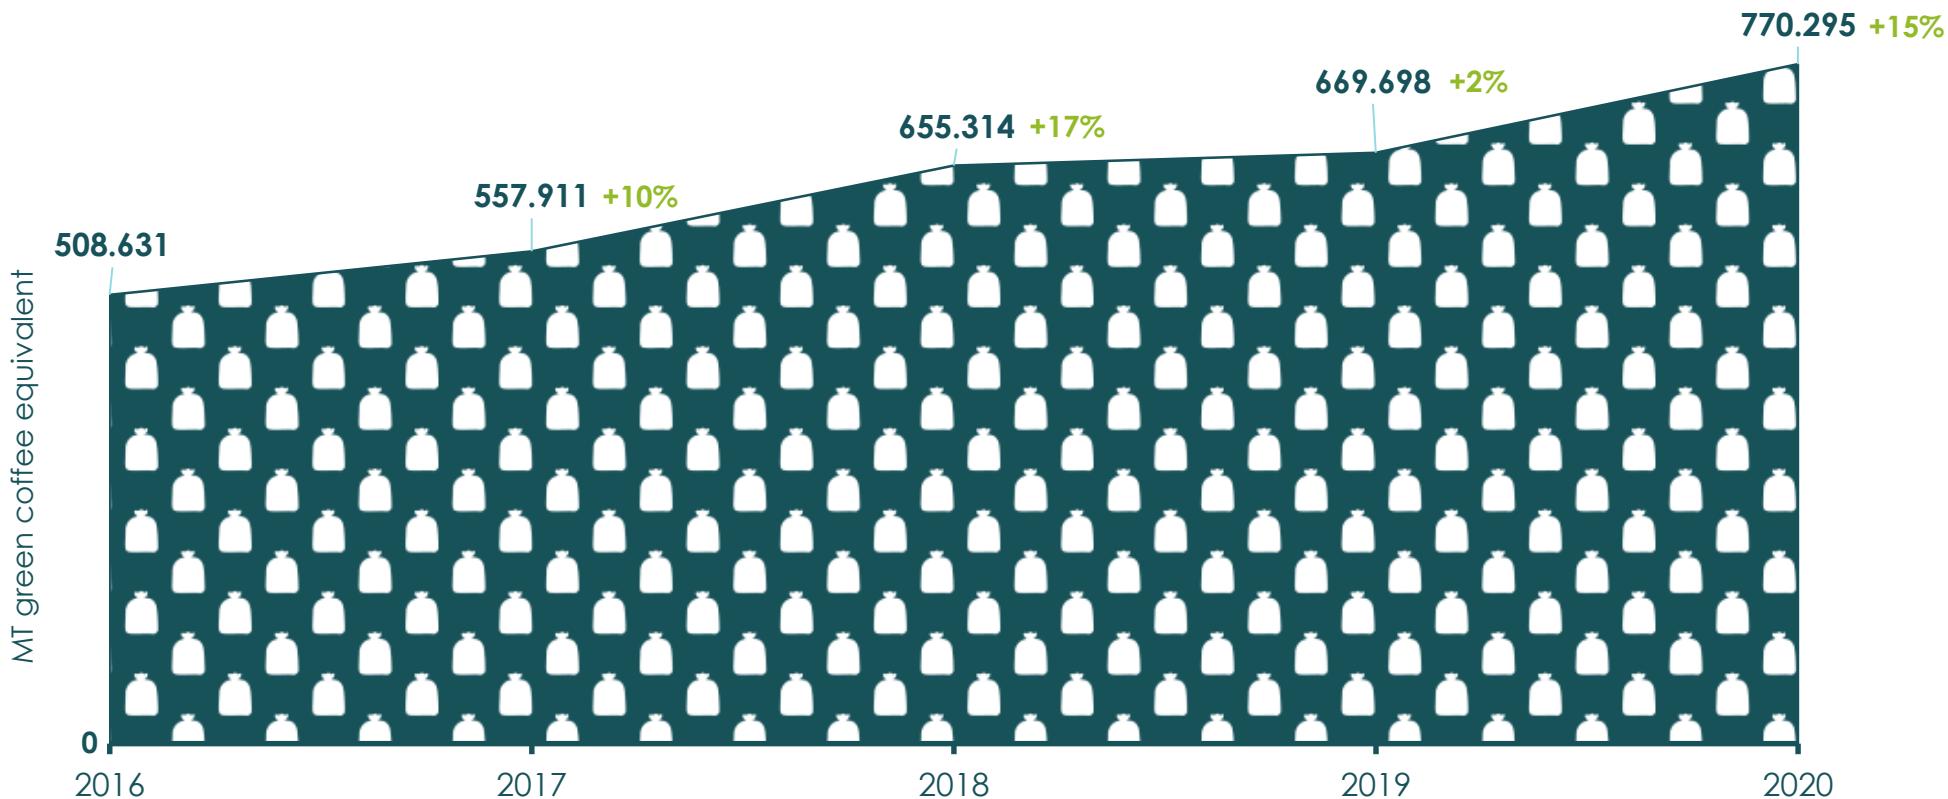

'Supply Chain Actors' include traders, roasters, brand owners, and retailers.

# Estimated Production

# Global estimated coffee production

The estimated certified volume increased by 15% (100,000 MT) vs. 2019.

Coffee Certification Data Report 2020  
Rainforest Alliance program

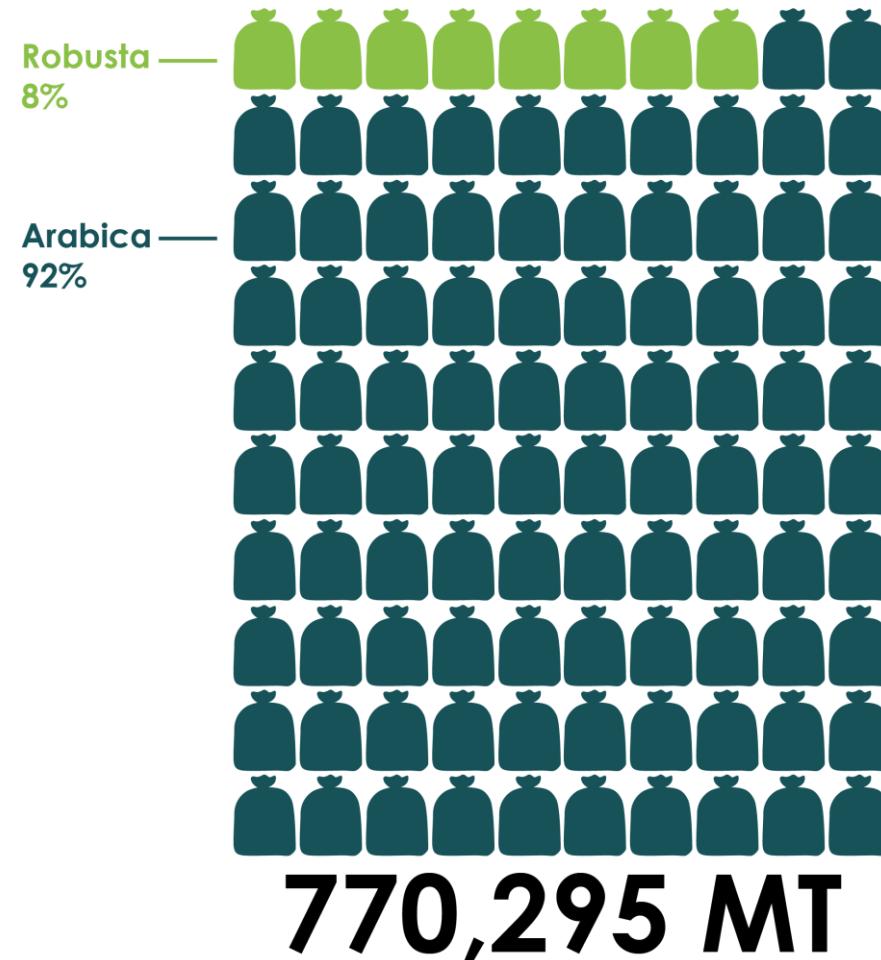

Estimated production is based on information from certificates valid on December 31, 2020.

## Estimated production – Arabica / Robusta

The total certified volume Arabica increased by 16%, (primarily led by Latin America) and makes up 92% of total certified volume.

Total certified volume Robusta increased by 9%, due to growth in Latin America and Africa. Robusta makes up 8% of total certified volume.

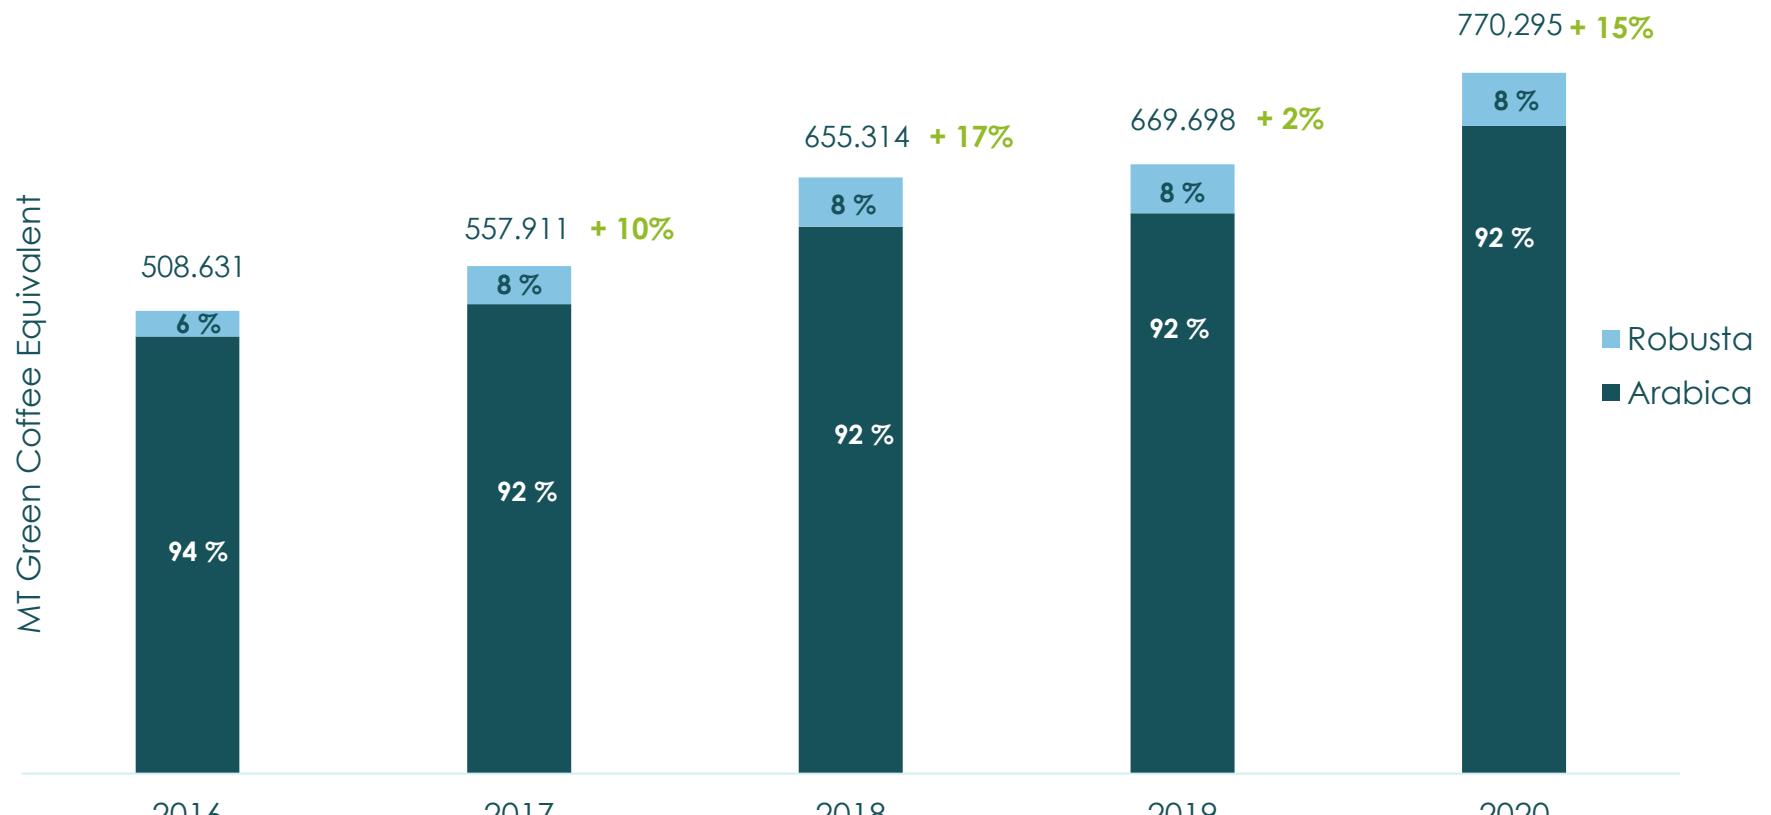

# Global estimated production

The estimated certified volume increased by 15% (100,000 MT) vs. 2019.

Arabica/Robusta ratio remains the same and aligned with ratio in sales.

Coffee Certification Data Report 2020  
Rainforest Alliance program

Estimated production is based on information from certificates valid on December 31, 2020.

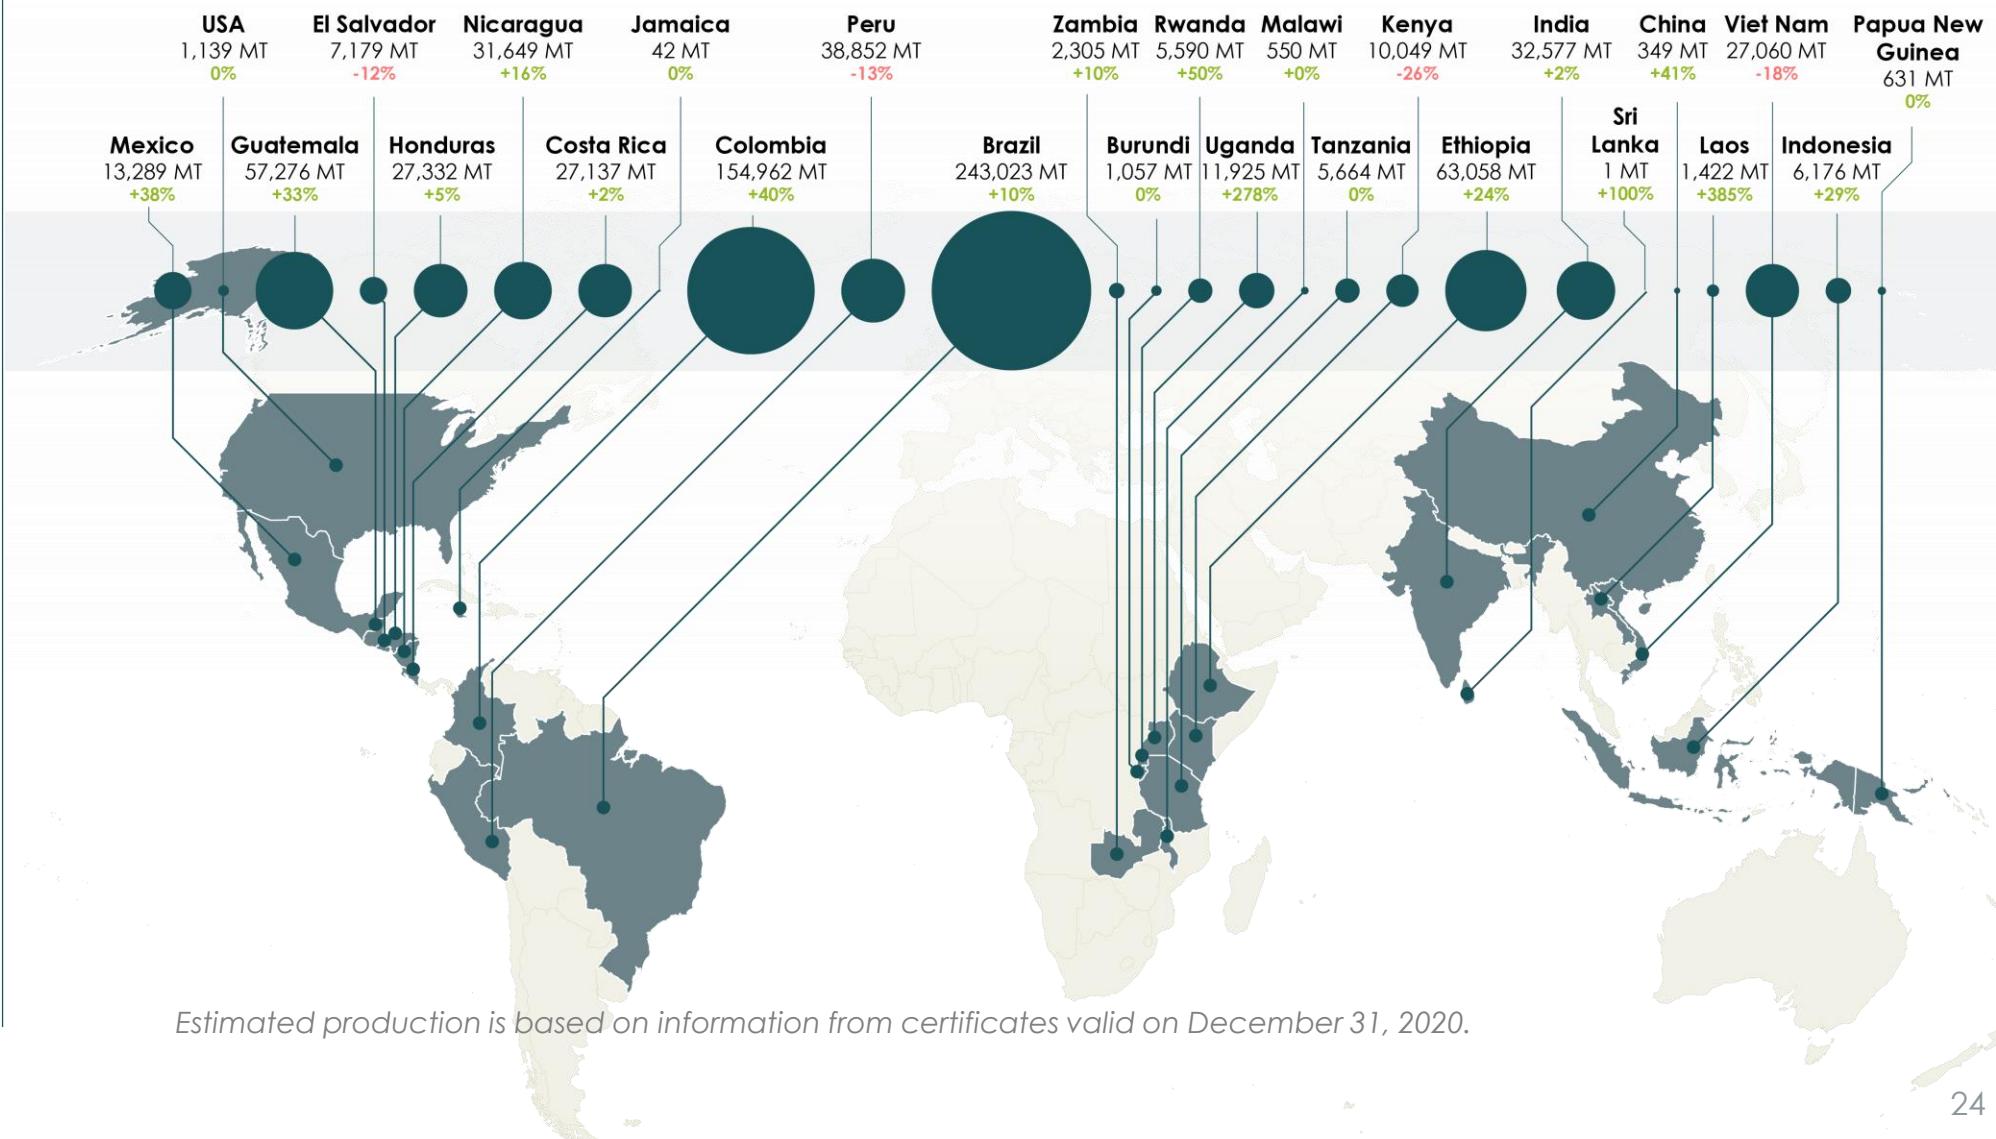

The estimated certified production volume in Latin America showed the strongest absolute growth (in MT), led by Colombia, Brazil and Guatemala.

Africa had the largest relative growth (+24%), mainly driven by Ethiopia and Uganda due to more certified area and an increased number of farmer groups.

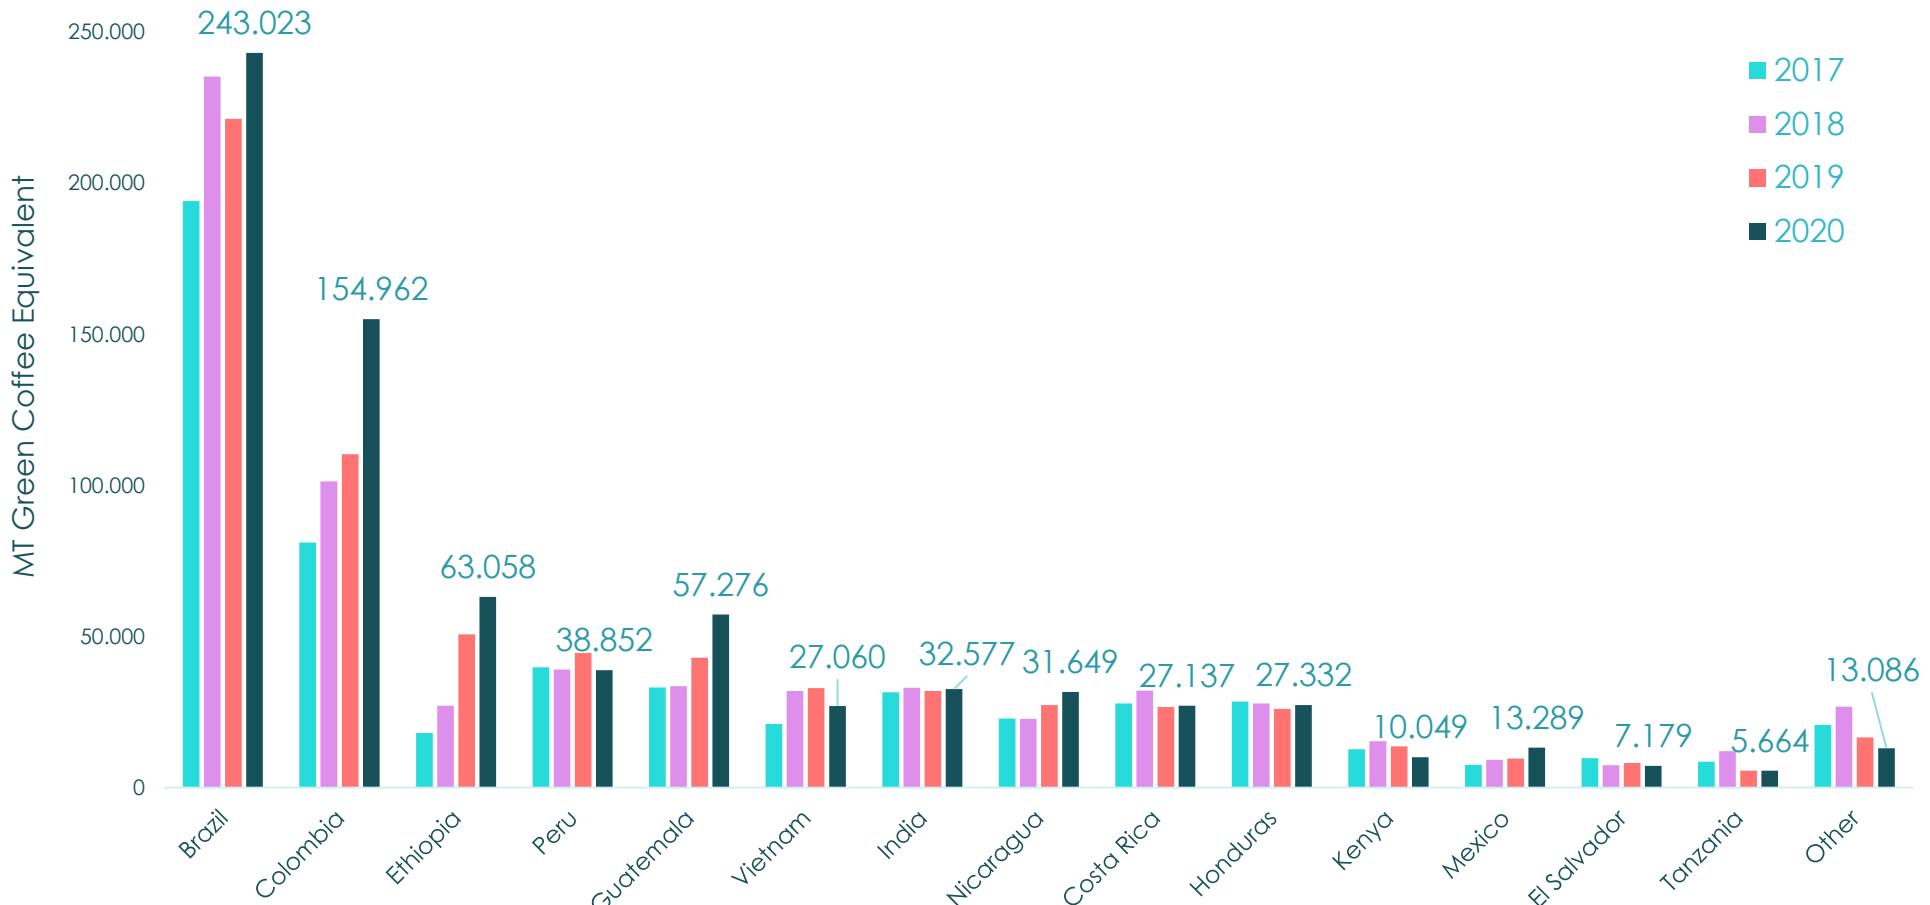

The estimated volume in Asia Pacific decreased by 4%, due to Vietnam where we saw a drop in the total number of certificate holders.

Coffee Certification Data Report 2020  
Rainforest Alliance program

# Estimated production per origin

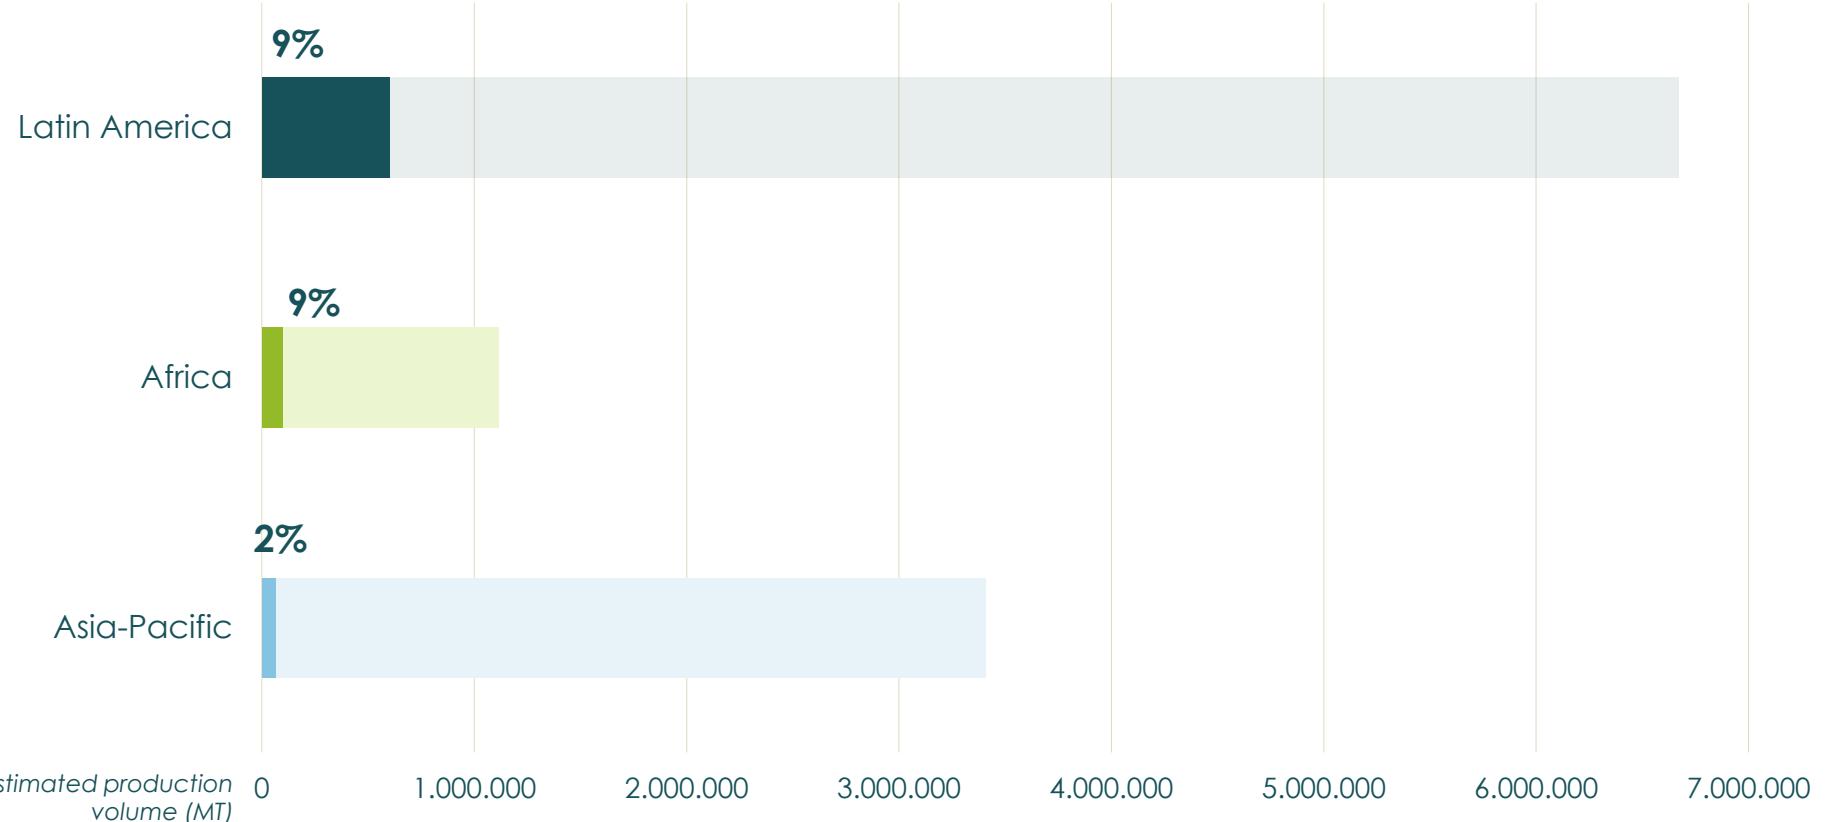

# Estimated production per origin

The top 3 producing countries remain the same as last year: Brazil (32% of the global production), Colombia (20%), and Ethiopia (7%).

# Production market share per region

In 2020, of all coffee produced globally 7% was Rainforest Alliance certified.

On regional level, certified coffee from Latin America and Asia Pacific had the highest production market share.

Coffee Certification Data Report 2020  
Rainforest Alliance program

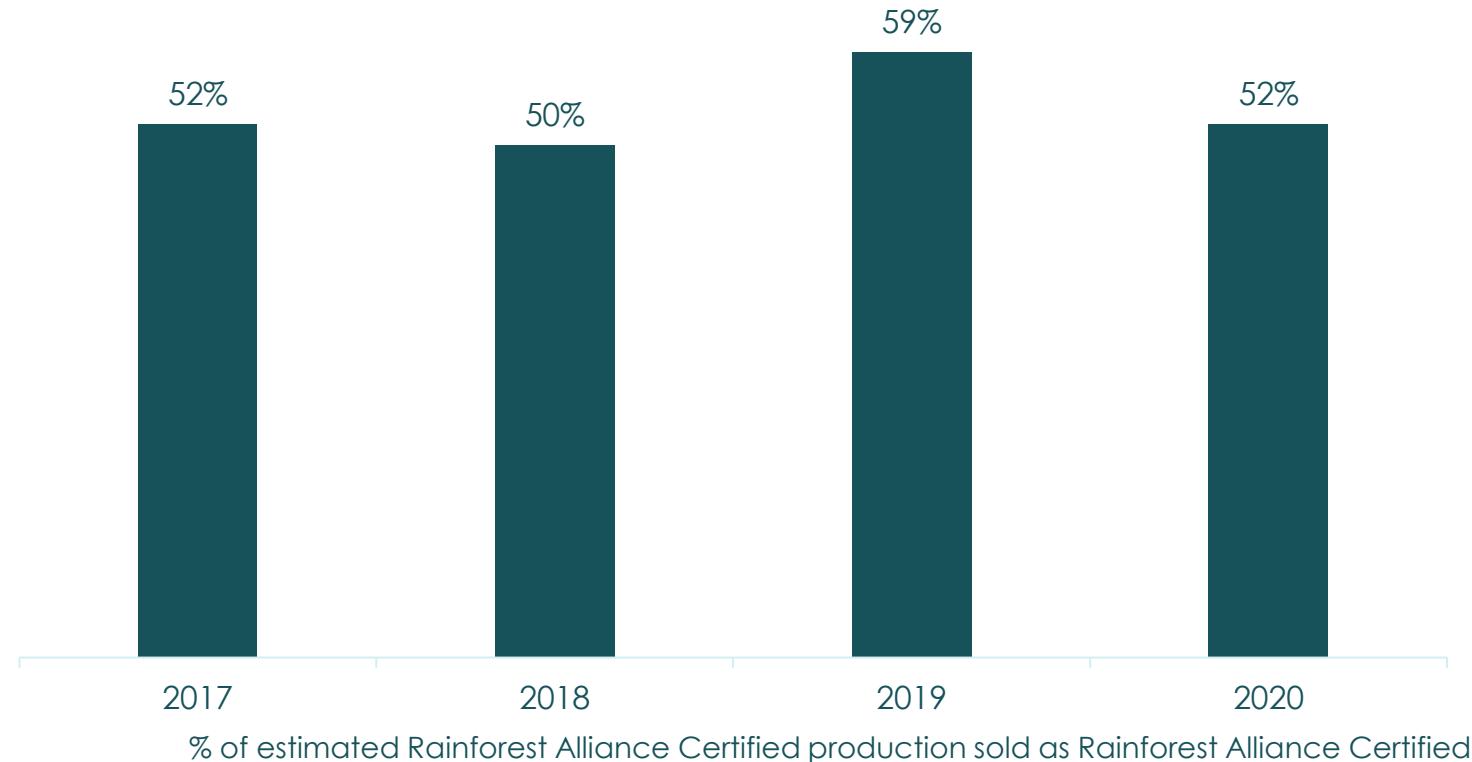

Rainforest Alliance Certified estimated coffee production vs. estimated regional production (Source [ICO](#))

# Supply and Demand ratio

# Supply – Demand ratio

Producers sold on average 52% of their estimated Rainforest Alliance Certified coffee volume as Rainforest Alliance Certified.

Coffee Certification Data Report 2020  
Rainforest Alliance program

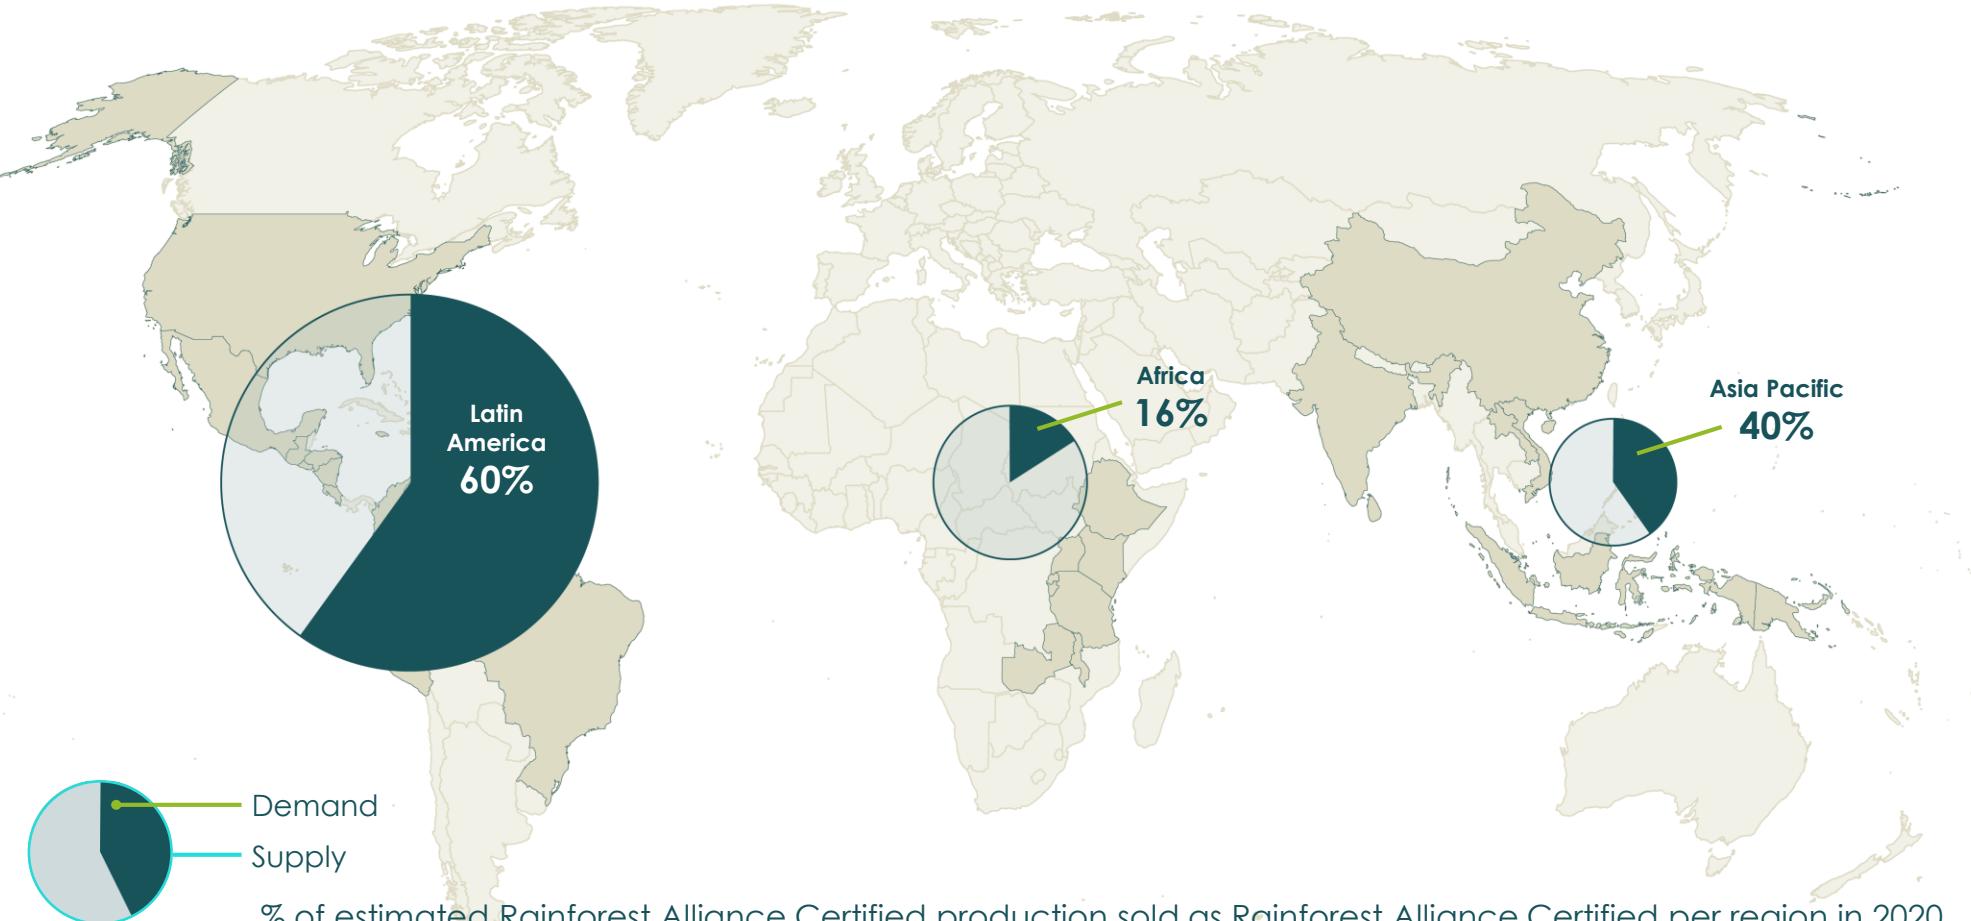

This is based on confirmed producer sales and estimated production on December 31, 2020. It indicates an estimation, not an absolute number.

# Supply – Demand per region

The global supply and demand ratio for the Rainforest Alliance coffee program decreased by 12% vs. 2019.

Latin America has the highest share of certified sales with 60% of certified production sold as Rainforest Alliance Certified.

Coffee Certification Data Report 2020  
Rainforest Alliance program

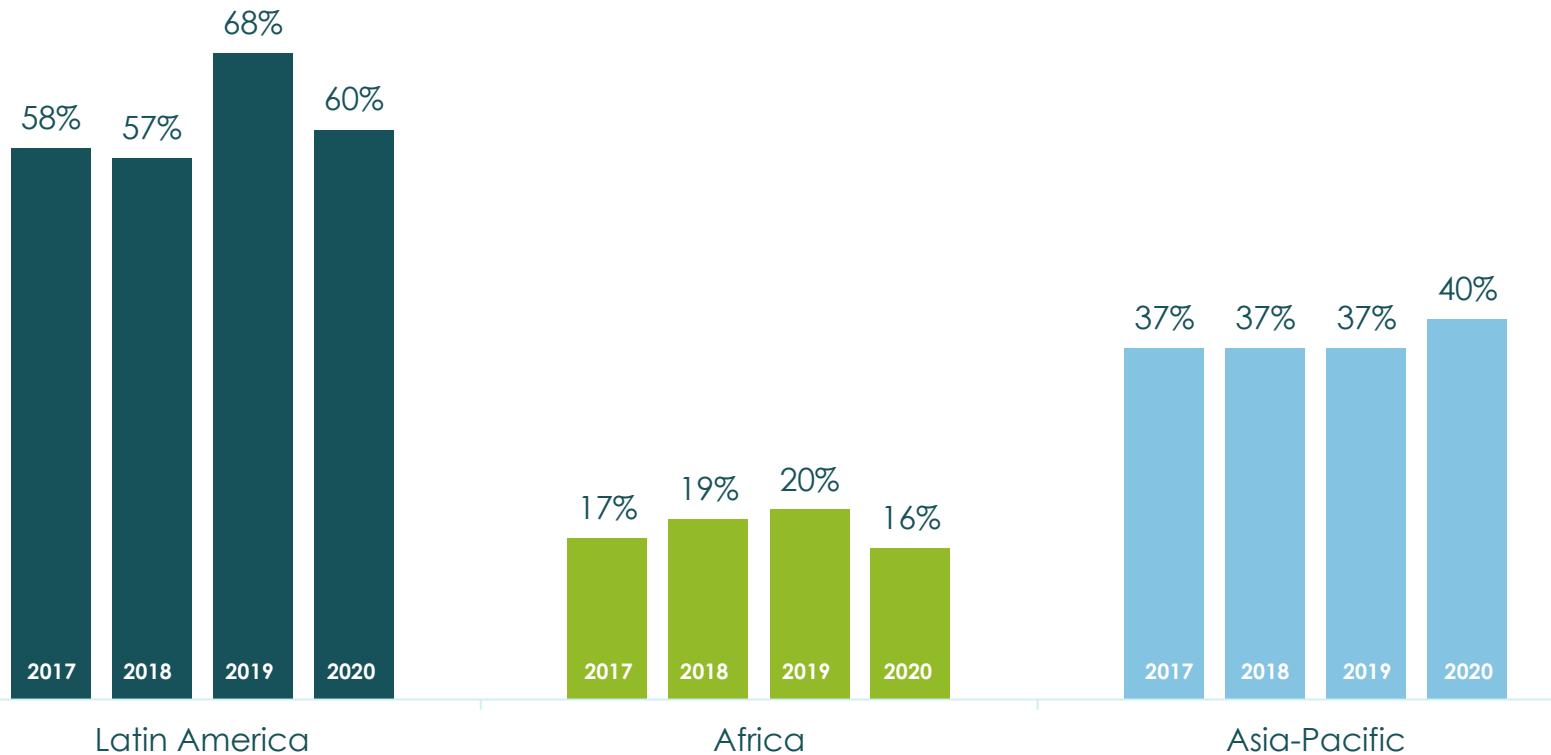

This is based on confirmed producer sales and estimated production on December 31, 2020. It indicates an estimation trend, not an absolute number.

# Supply – Demand per region

The decrease in the global supply and demand ratio for the Rainforest Alliance coffee program is reflected in Latin America and Africa.

In Asia Pacific producers sold on average more of their certified production as certified compared to previous years.

% of estimated Rainforest Alliance Certified production sold as Rainforest Alliance Certified per region

This is based on confirmed producer sales and estimated production on December 31, 2020. It indicates an estimation, not an absolute number.

# Multi-certification

# Multi-certification

## 40%

of the Rainforest Alliance producer groups and individual farms were certified for at least one other standard

Double-certification Rainforest Alliance and UTZ is the predominant combination with 28%.

Coffee Certification Data Report 2020  
Rainforest Alliance program

**28% UTZ**  
**18% Organic**  
**14% Fairtrade**  
**16% Other**

Multi-certified represents the number of Rainforest Alliance Certified coffee producer groups and individual farms that were also certified for one or more of the following schemes: UTZ, Organic, Fairtrade and other schemes.

Relative growth  
2019-2020:  
**-8%**

# Program reach

In 2020, the estimated certified production area increased slightly (+7%) compared to 2019. The growth was mainly driven by gains in Africa (+15%) and to a lesser extent in Latin America (+9%).

## Area (hectare)

In 2020, the estimated certified volume increased by 14% vs 2019, mainly led by Latin America (+19%). Asia and Pacific showed an increase of 7%, whereas Africa saw a drop of 9%. The top 3 producing countries are Brazil, Vietnam, and Colombia.

## Estimated production (MT)

In 2020, the number of farmers increased by 6% vs. 2019, driven by Asia Pacific (+31%) and Latin America (+15%). The number of farmers in Africa decreased by 5%, due to lower numbers in Burundi, Democratic Republic of the Congo and Ethiopia. Nevertheless, there were strong gains in Tanzania and Rwanda.

## Number of farmers

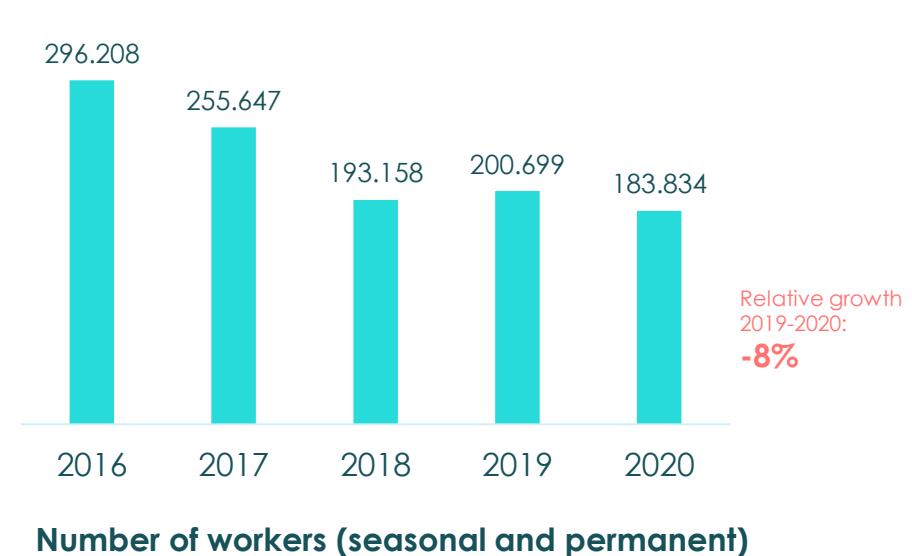

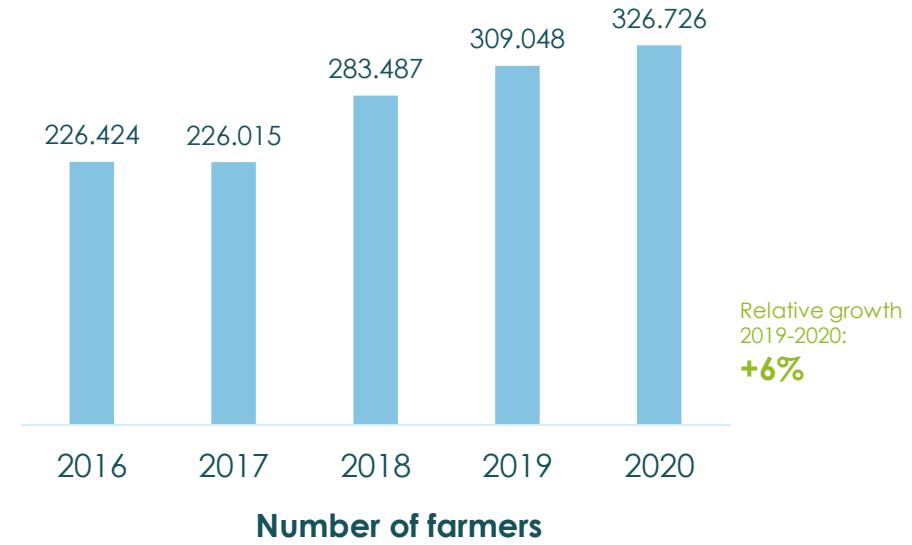

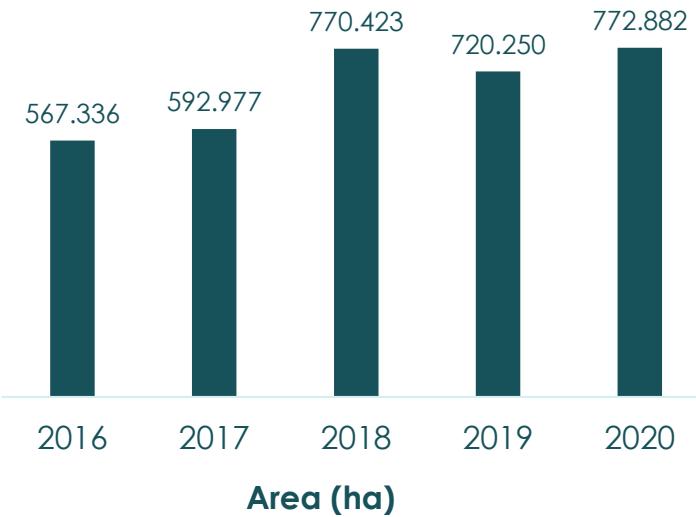

In 2020, as opposed to the other indicators, the number of workers decreased by 8% compared to 2019. This trend is reflected on a regional level, with the largest drop in Latin America (-14%). The lower number can partly be explained by COVID-19 restrictions on work and travel.

## Number of workers (seasonal and permanent)

# Program reach

# Global sales

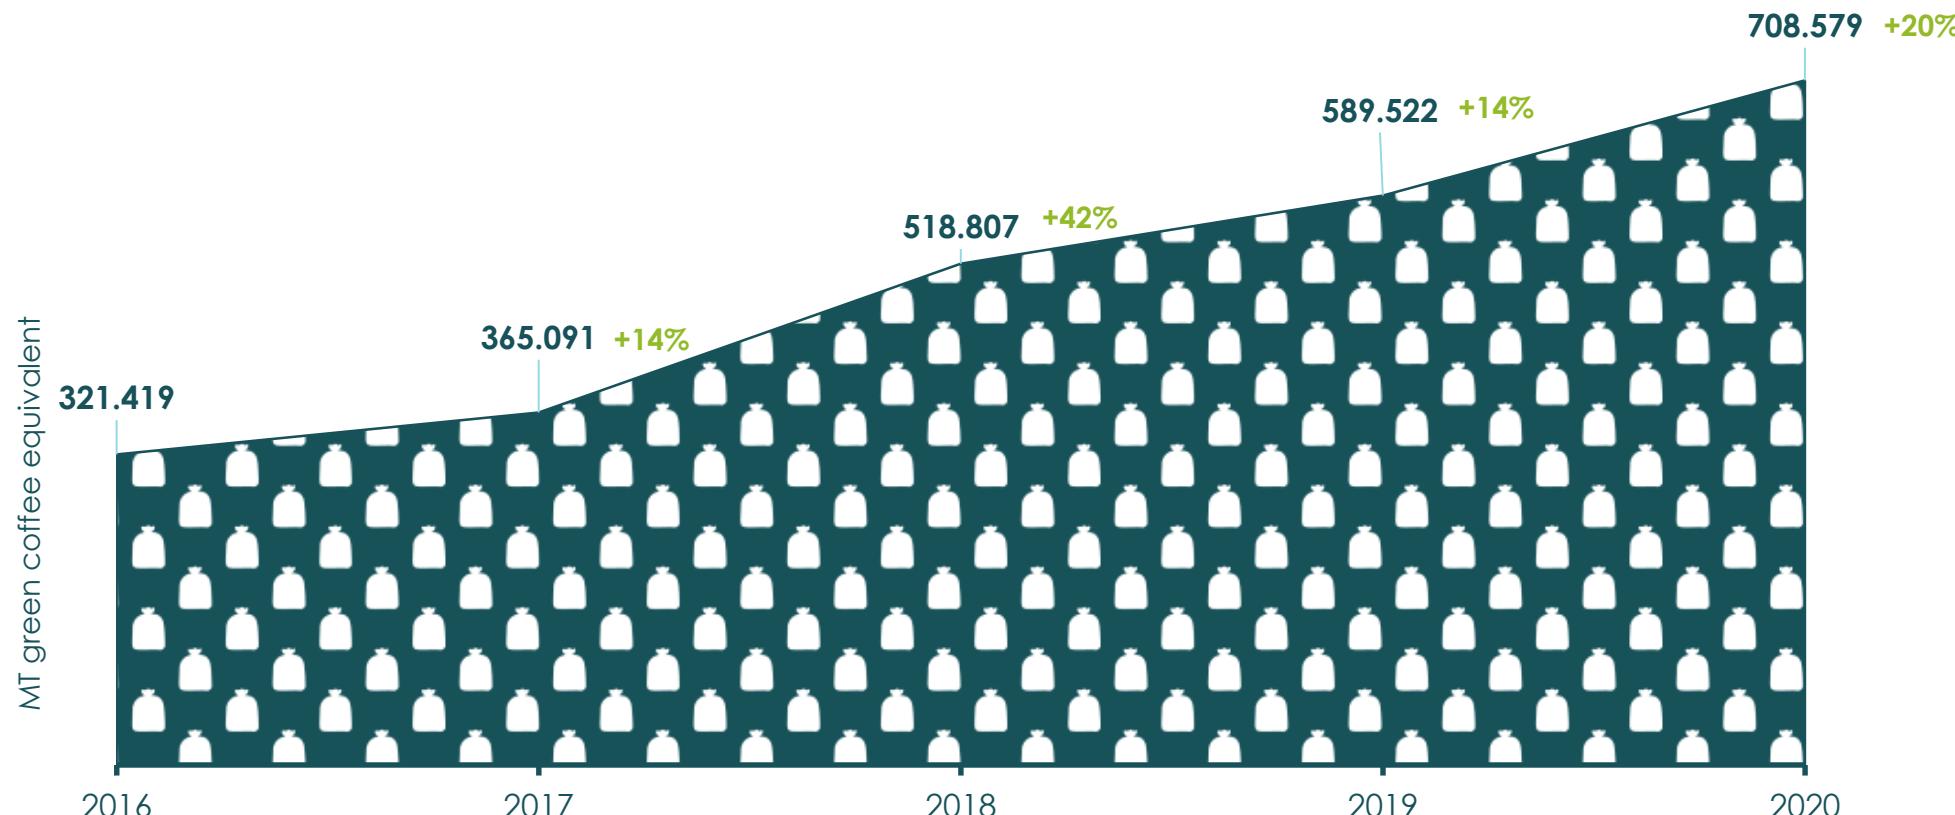

# Global coffee sales

In line with previous years, the global UTZ coffee sales increased by 20%, with the highest increase in absolute terms in Latin America.

Most UTZ coffee sales came from Brazil, Vietnam, and Honduras.

Coffee Certification Data Report 2020  
UTZ program

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

# Global sales per origin

<b>Guatemala</b> 12,381 MT -2%	<b>Nicaragua</b> 15,793 MT -31%	<b>Brazil</b> 276,735 MT +8%	<b>Burundi</b> 1,822 MT -12%	<b>Uganda</b> 8,321 MT +73%	<b>Kenya</b> 3,110 MT +60%	<b>India</b> 18,875 MT +28%	<b>Laos</b> 5,659 MT +499%	<b>Indonesia</b> 4,917 MT -20%

The global sales increase is reflected across all regions; Asia and Pacific (+45%) with the biggest growth in absolute numbers in Vietnam, Africa (+40%), and Latin America (+12%).

Coffee Certification Data Report 2020  
UTZ program

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

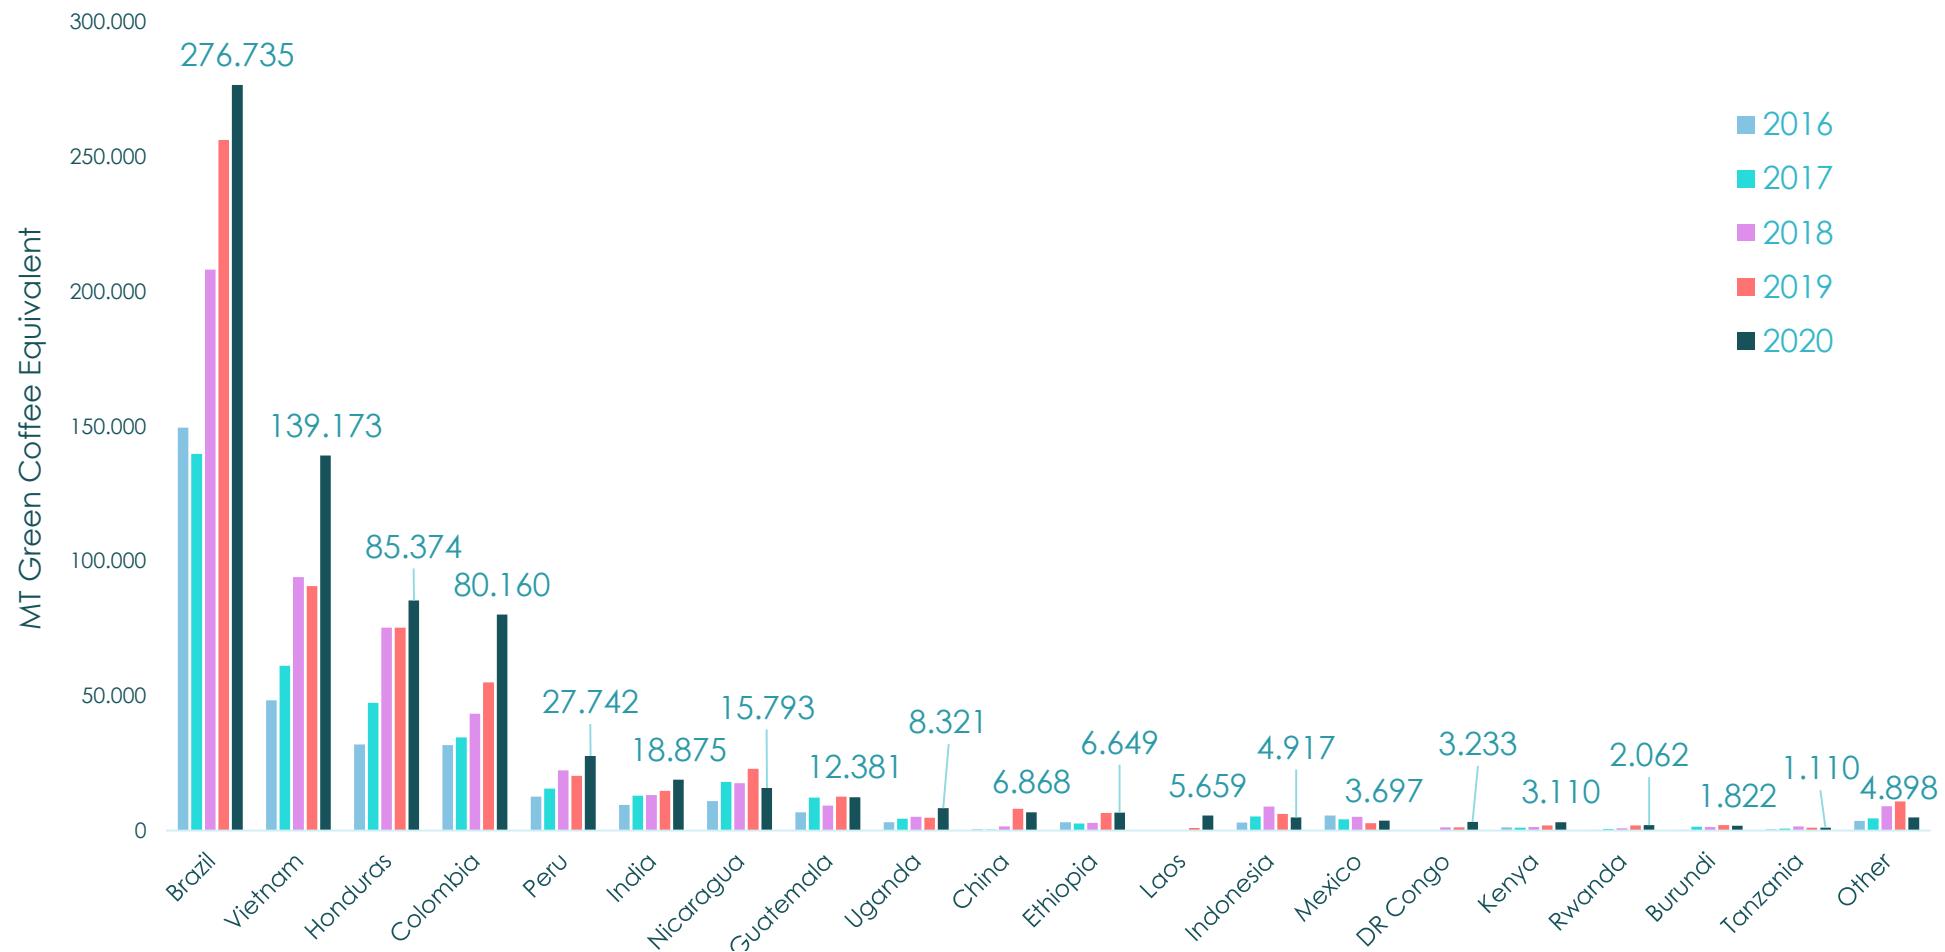

Most UTZ certified coffee was sold from producers in Brazil (39% of global sales), Vietnam (20%), and Honduras (12%).

The strong sales growth in Vietnam is multi-factored; a rising roaster and consumer demand for certified coffee, especially some of the big roasters increased their demand for certified Robusta, a large production volume, and coffee prices in Vietnam are favorable compared to other countries.

In Colombia, a perceived scarcity of UTZ coffee triggered large purchases mid-2020.

Coffee Certification Data Report 2020  
UTZ program

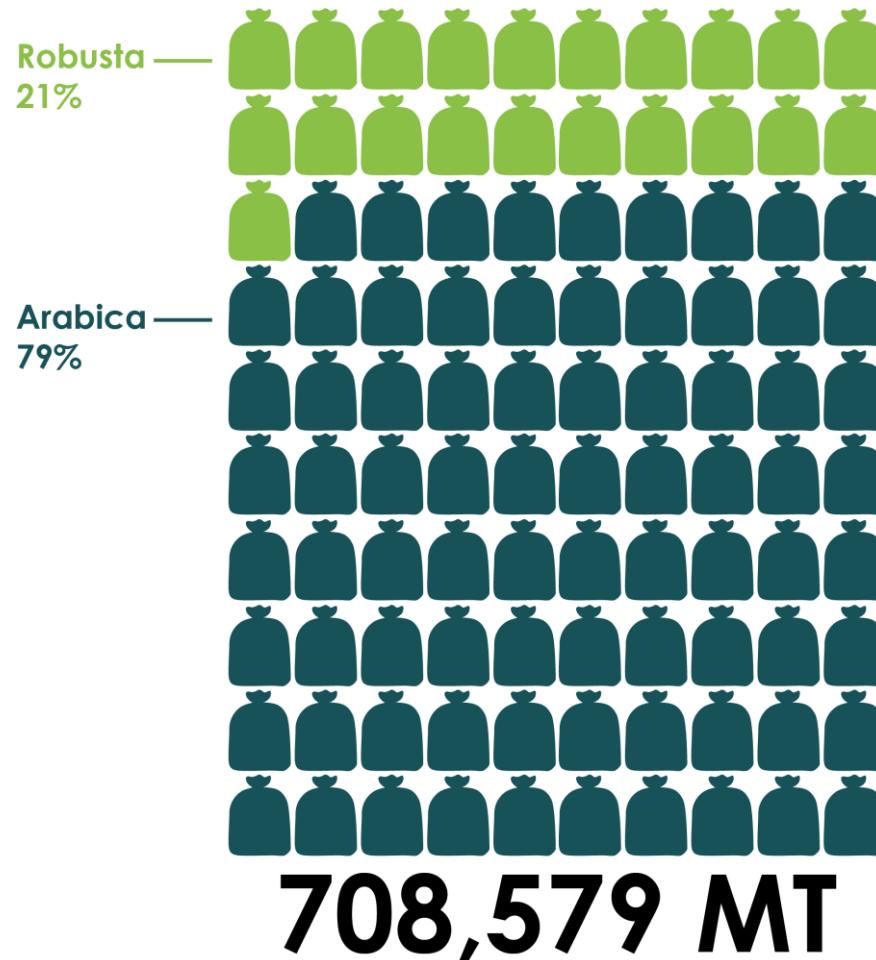

# Global sales per origin

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

## Global sales - split Arabica / Robusta

Arabica sales makes up 79% of all global coffee sales.

Global Robusta sales makes up 21% of total coffee sales.

Coffee Certification Data Report 2020  
UTZ program

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

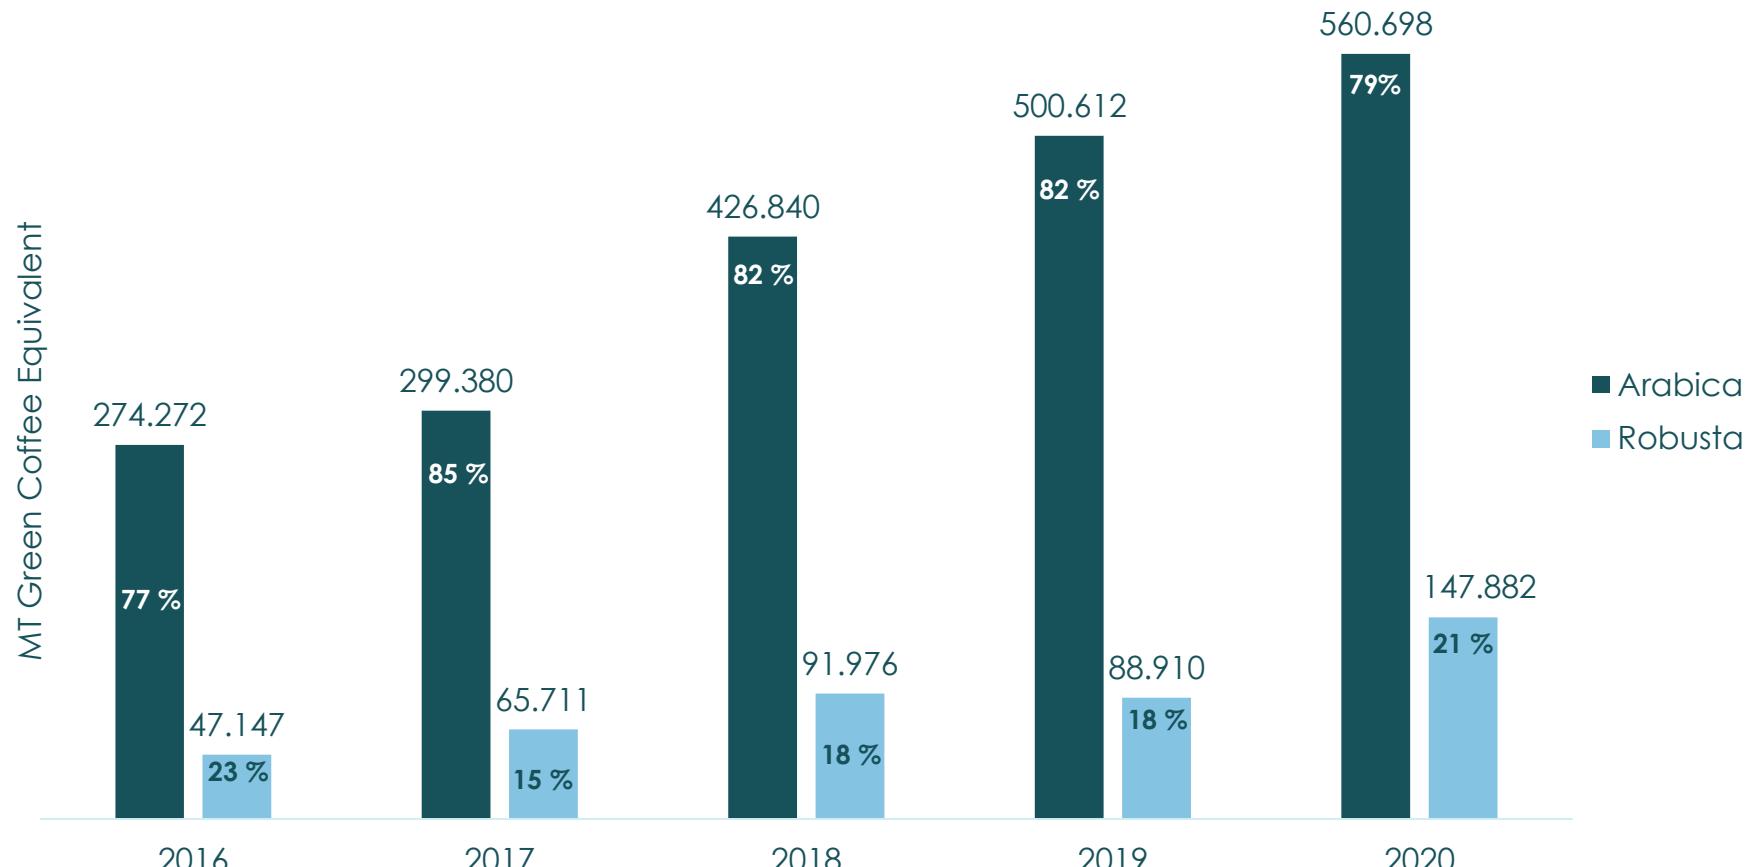

Arabica sales increased by 12% vs. 2019 to 560,698 MT, mainly driven by coffee sold from Africa and Latin America.

Robusta sales grew strongly (+66%) to 147,882 MT due to a large growth from Vietnam.

Coffee Certification Data Report 2020  
UTZ program

# Global sales - Arabica and Robusta

'Global sales' are all the confirmed volumes sold from a certified producer to the first buyer. Years are calendar years.

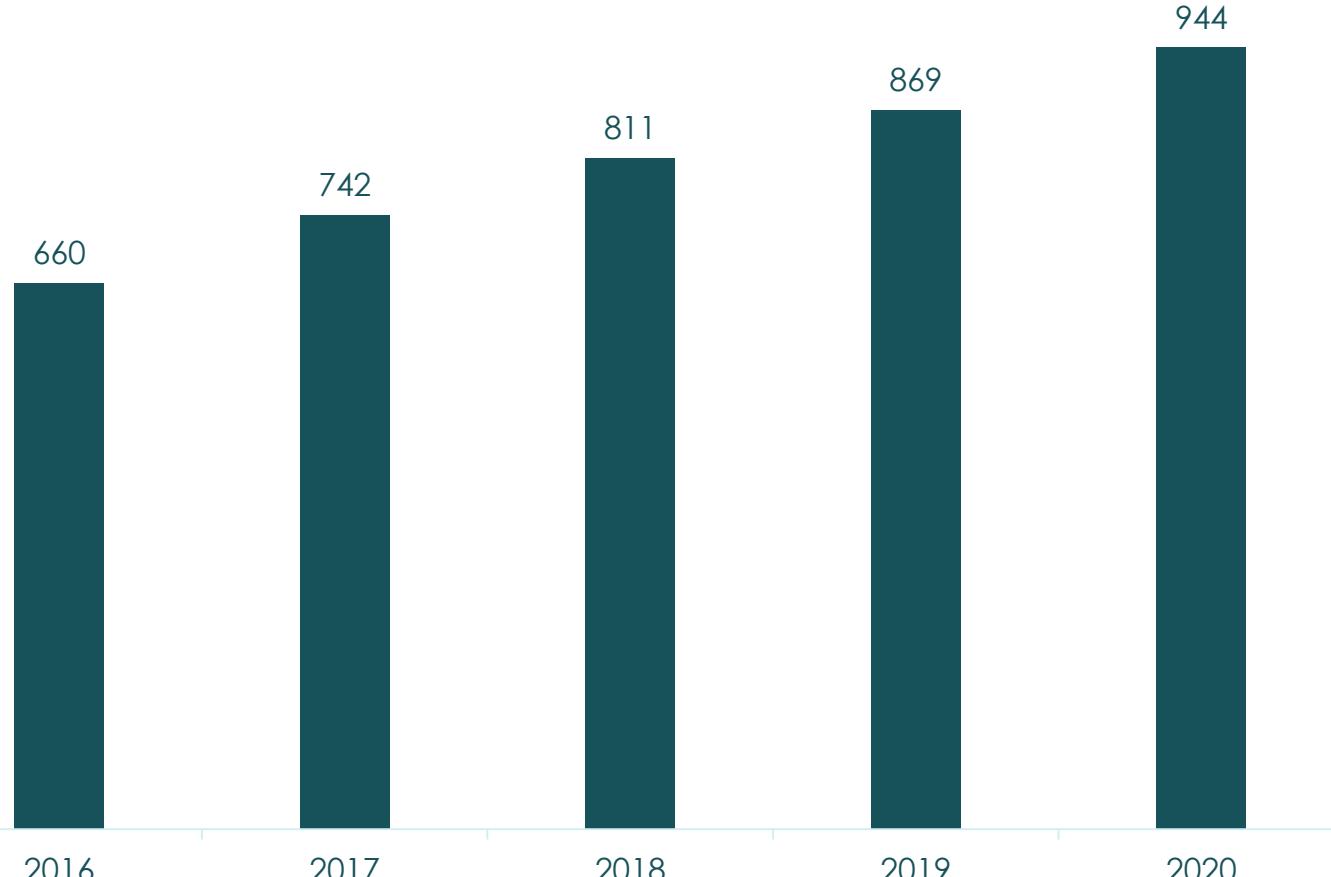

# Registered supply chain actors

In 2020, the number of supply chain actors within the program increased by 9%.

The number of supply chain actors increased across all regions, with the largest increase in Latin America (+13%). Asia Pacific saw a growth of 10%, North America 6%, Europe 4%, and Africa 3%.

Coffee Certification Data Report 2020  
UTZ program

'Supply Chain Actors' include various actors, including traders, roasters, and retailers

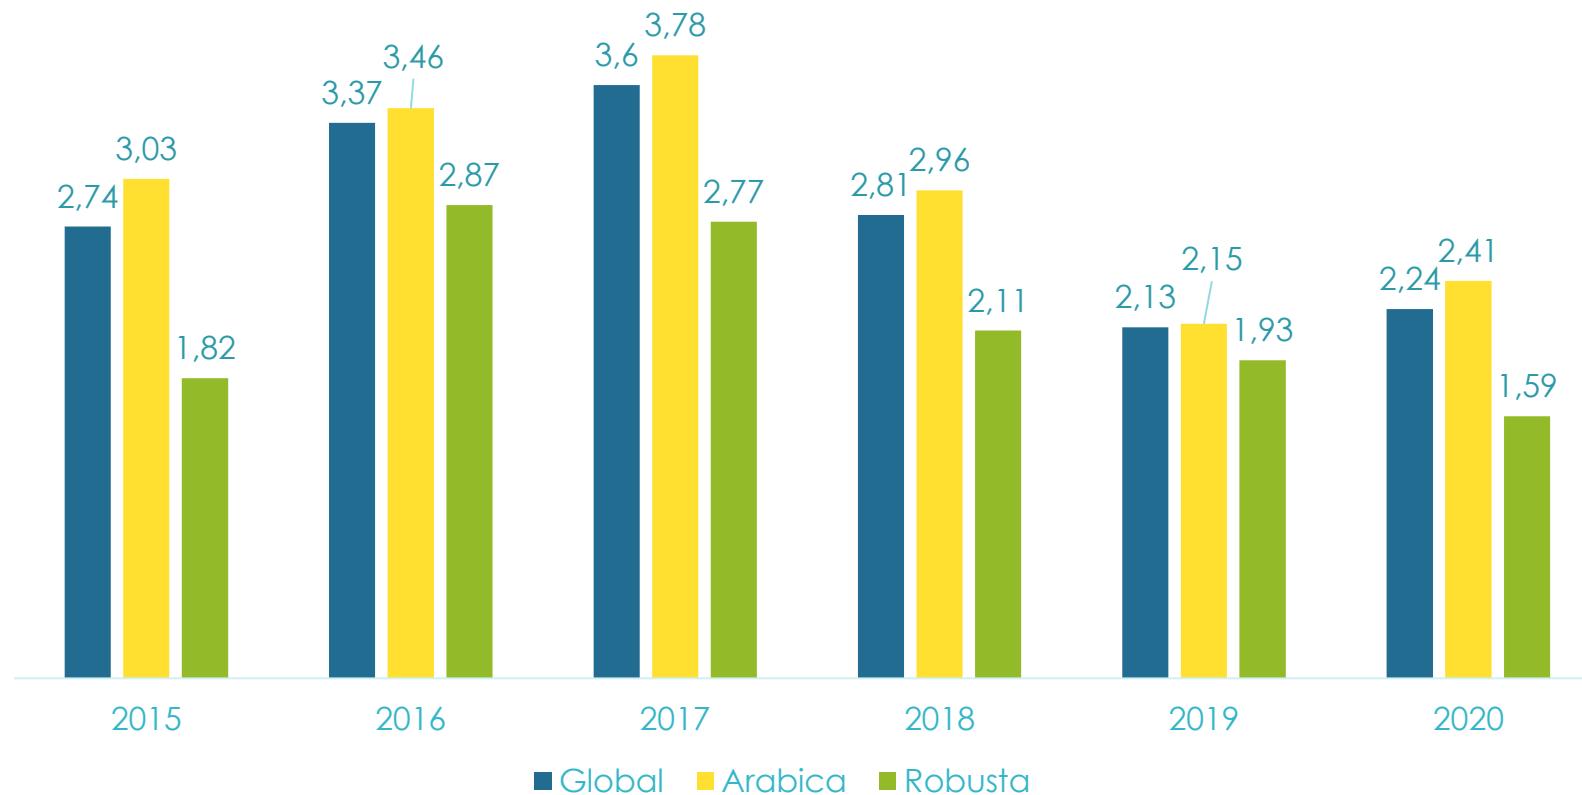

UTZ global coffee premium increased with 4% vs. 2019 to 2.24 \$c/lbs.

The UTZ premium is an additional cash amount paid above the market price for a similar conventional (non-certified/non-verified) product. It is mandatory and agreed upon between the certified group or producer and the first buyer.

In line with previous years, a higher premium is paid for Arabica. The gap with Robusta premiums increased as they grew in opposite directions.

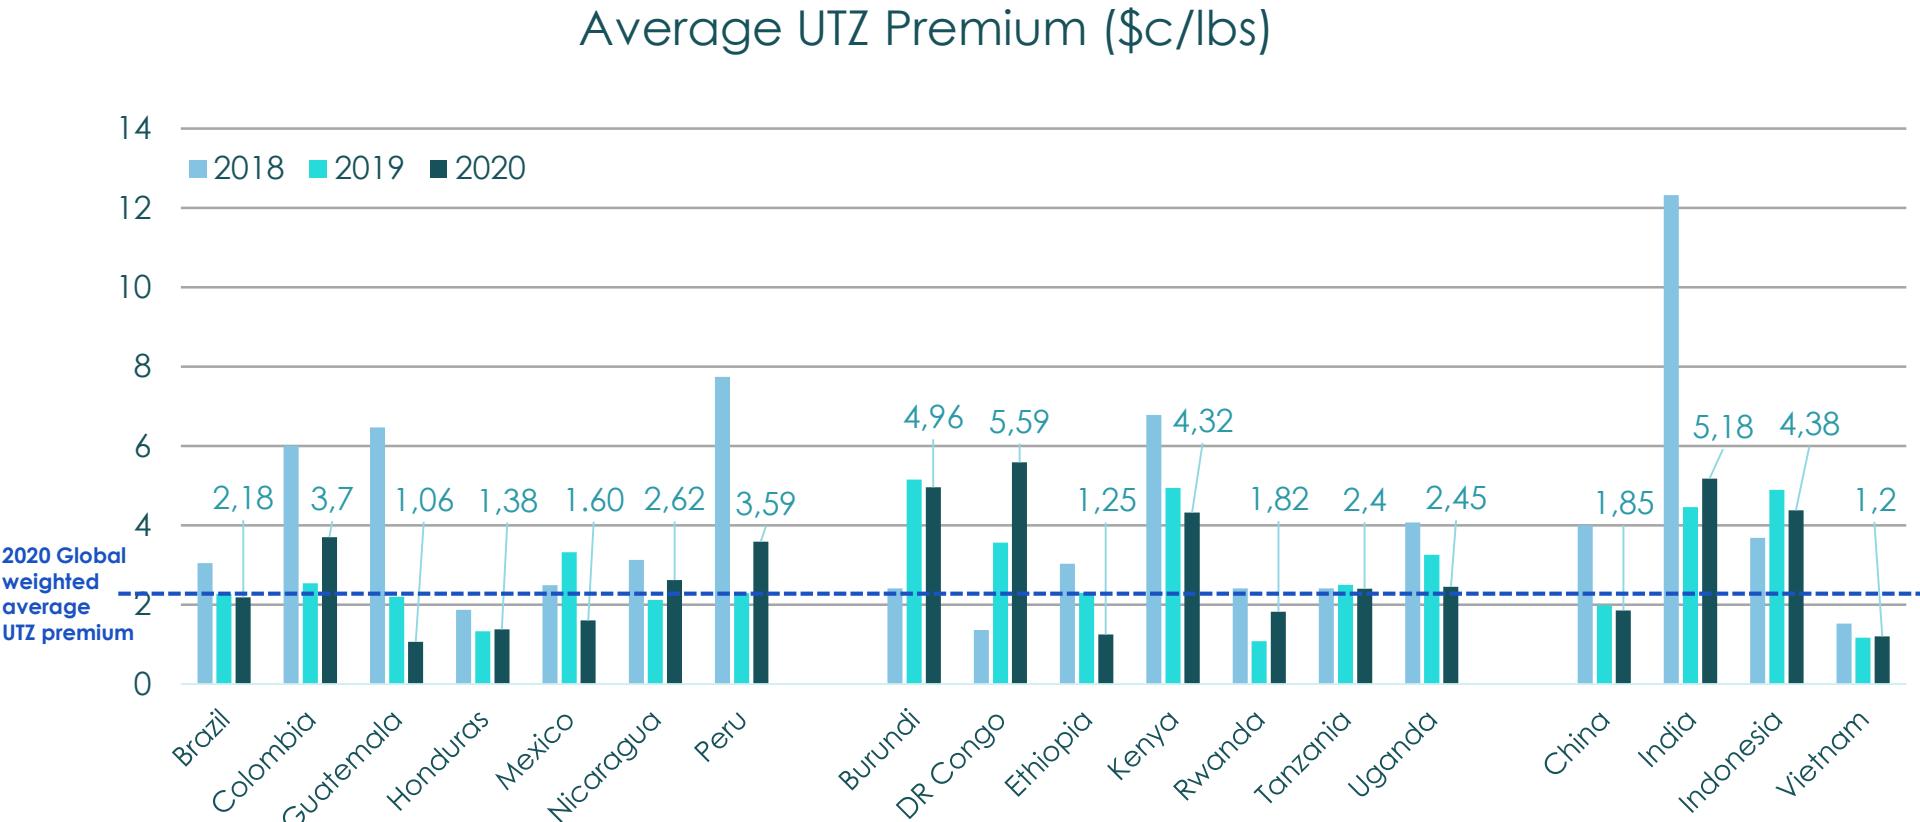

## Premium

Global average UTZ Premium (\$c/lbs)

# Premium per country – per continent

Overall we saw an increase in global average UTZ premium, though the average premium per country differs a lot.

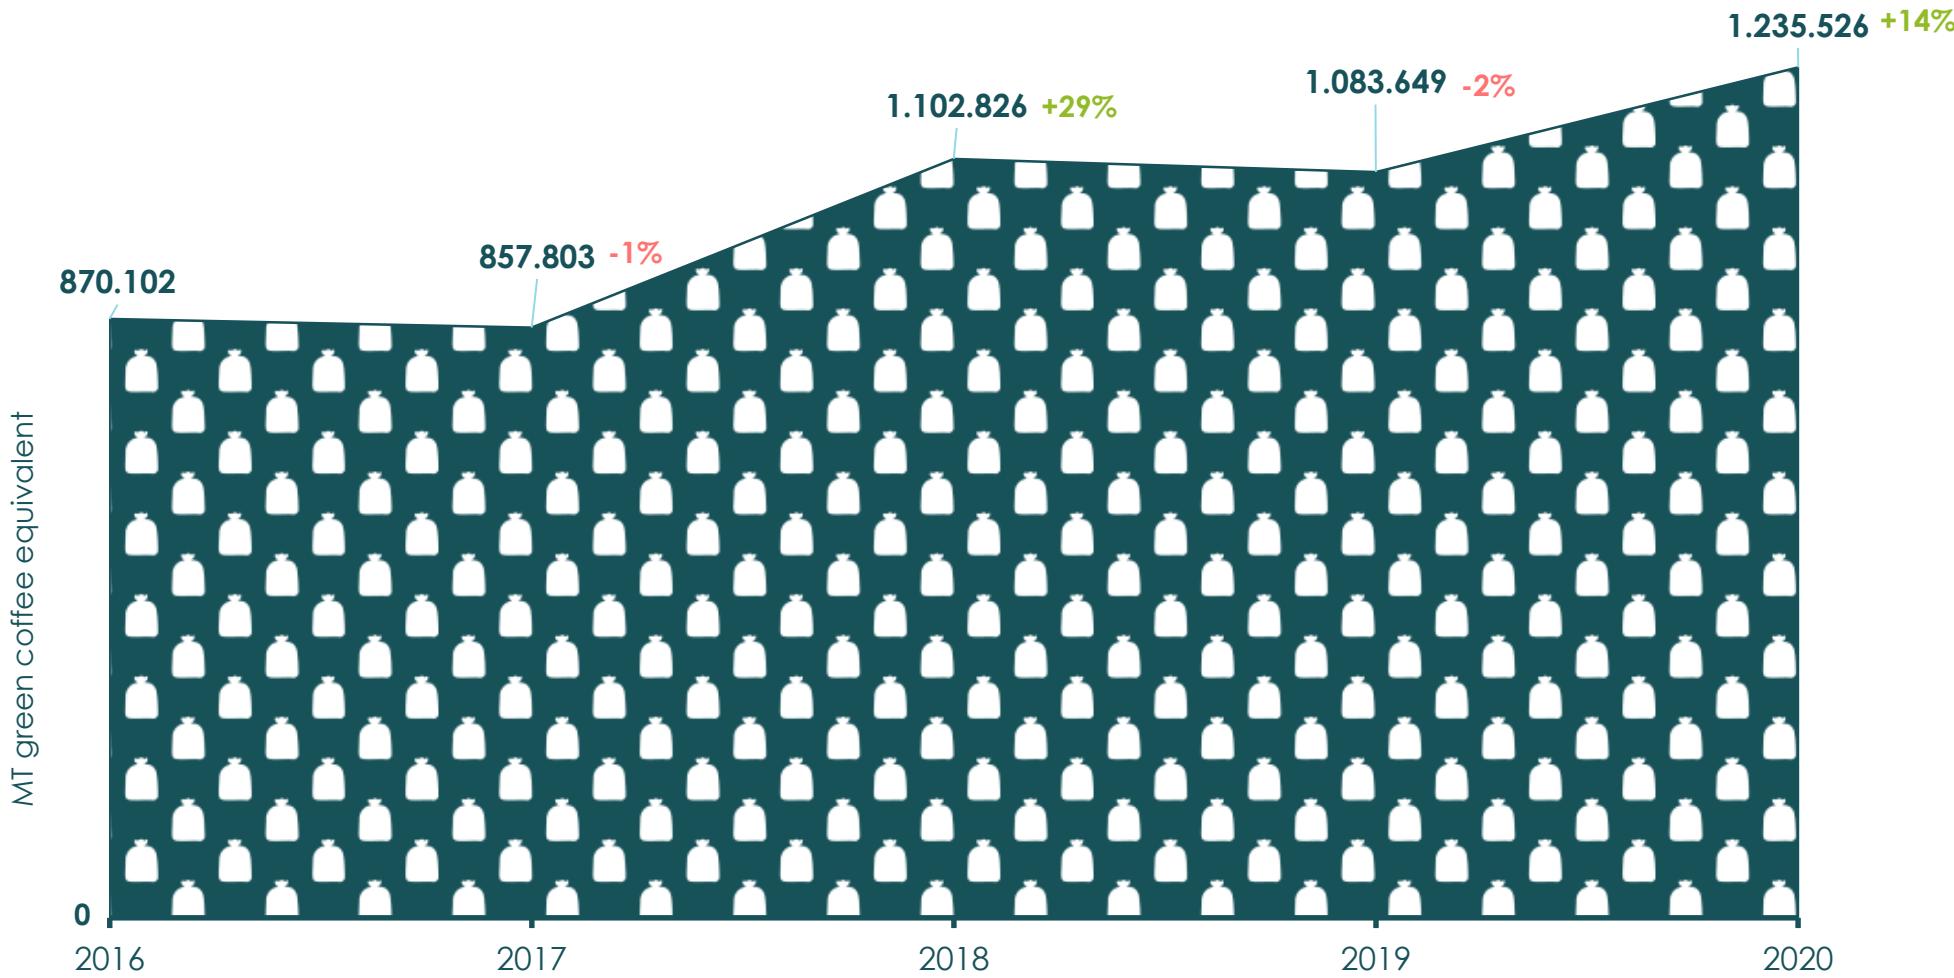

# Estimated Production

# Global estimated coffee production

The estimated certified volume increased by 14% (152,000 MT) vs. 2019.

Coffee Certification Data Report 2020  
UTZ program

Estimated production is based on information from certificates valid on December 31, 2020 and those under review where a positive certification decision is expected.

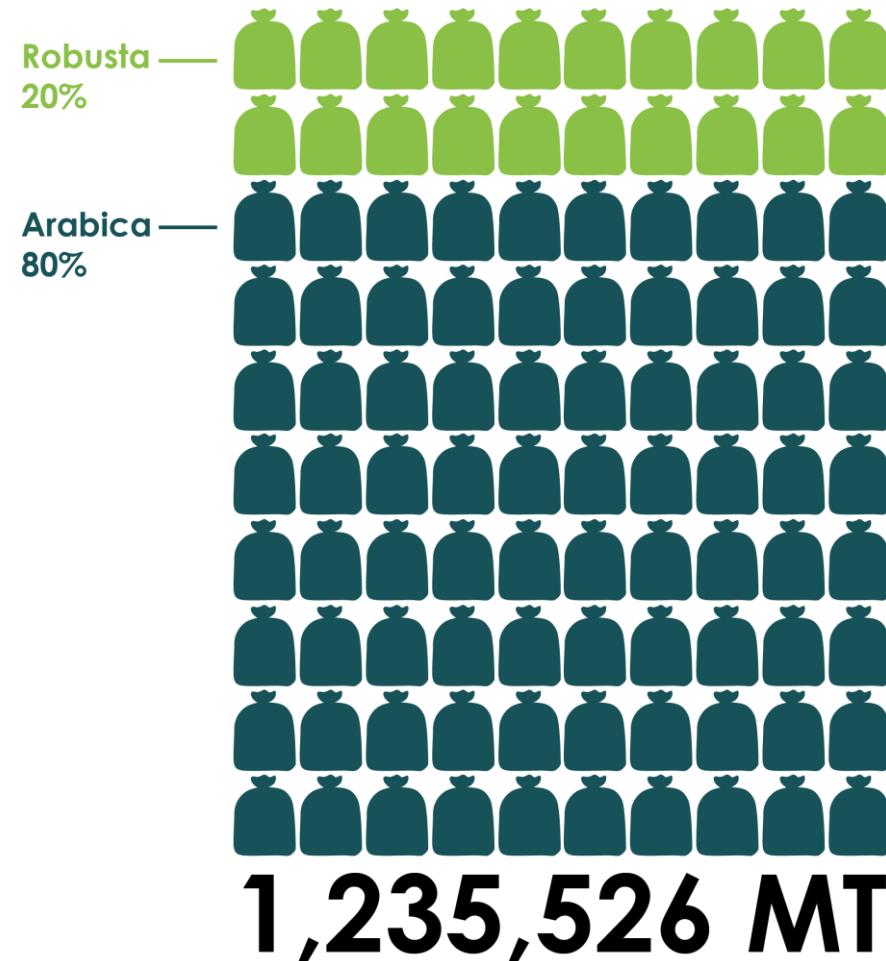

# Estimated production – Arabica / Robusta

The total certified volume Arabica increased by 18%, (primarily led by Latin America) and makes up 80% of total certified volume.

Total certified volume Robusta increased by 5%, due to growth in Latin America and Africa. Robusta makes up 20% of total certified volume.

Coffee Certification Data Report 2020  
UTZ program

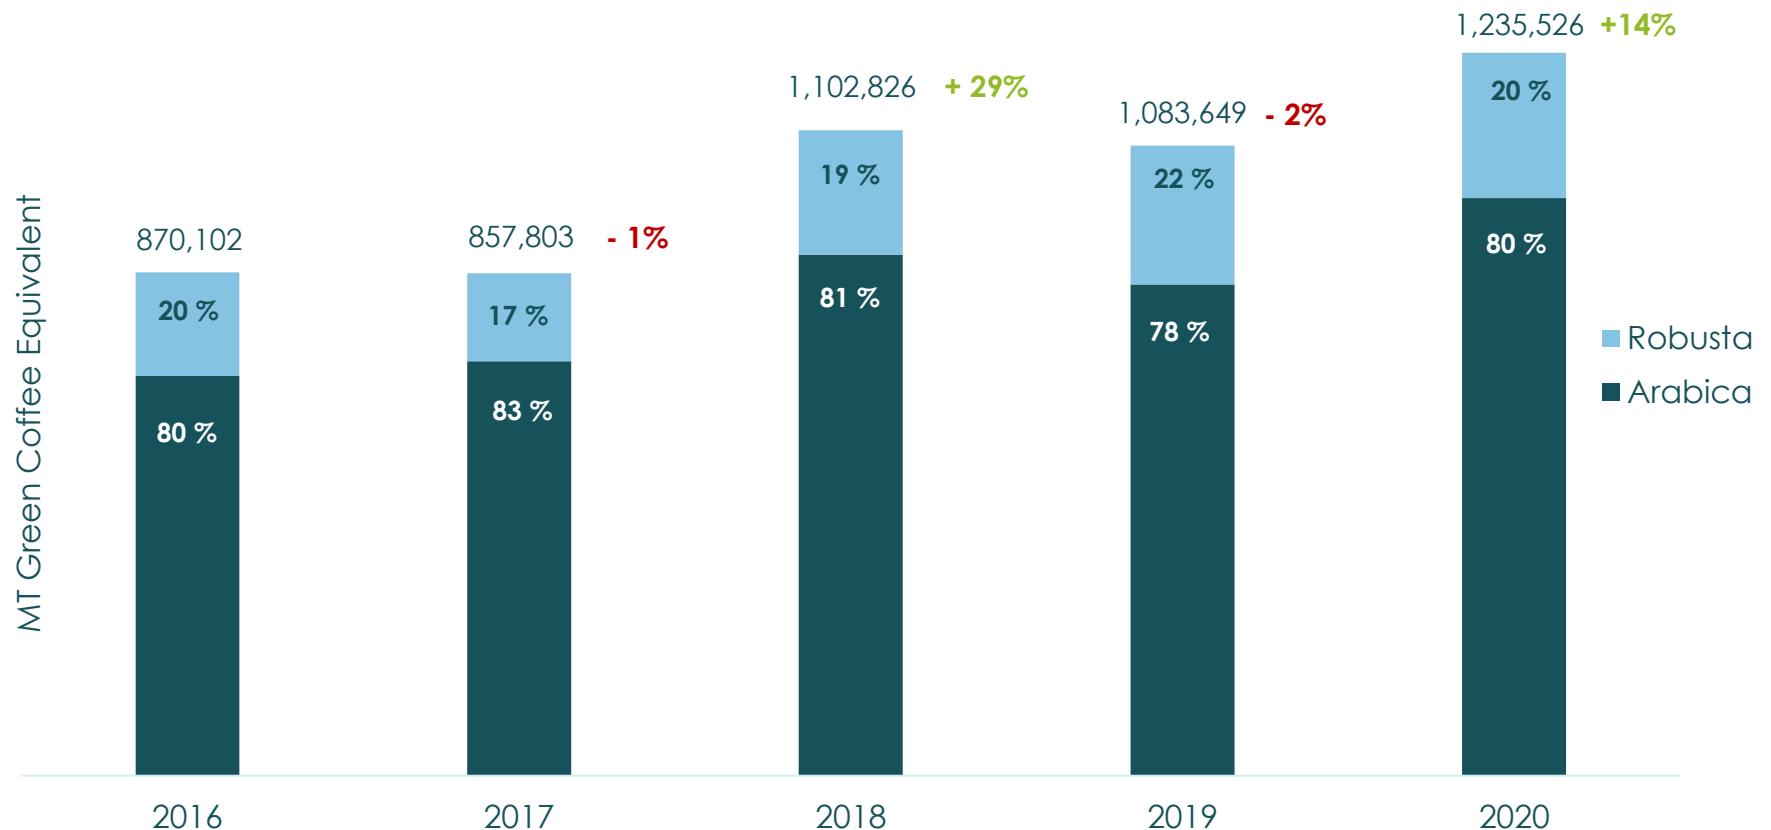

Estimated production is based on information from certificates valid on December 31, 2020 and those under review where a positive certification decision is expected.

# Global estimated production

The estimated certified volume increased by 14% (152,000 MT) vs. 2019.

Minor shift from Robusta back to Arabica due to the strong increase Arabica volume in Latin America and Asia Pacific.

Coffee Certification Data Report 2020  
UTZ program

Estimated production is based on information from certificates valid on December 31, 2020 and those under review where a positive certification decision is expected.

The estimated certified production volume in Latin America showed the strongest growth (+19%), reflected by a growth in all countries.

Volumes in Asia Pacific increased by 7%, led by Vietnam, Laos, and China, triggered by both demand and farming practices.

Africa (-9%) saw drop in most countries, except in Rwanda and Tanzania which can be explained by the (re)entry of large farmer groups and liberation of policies in Tanzania.

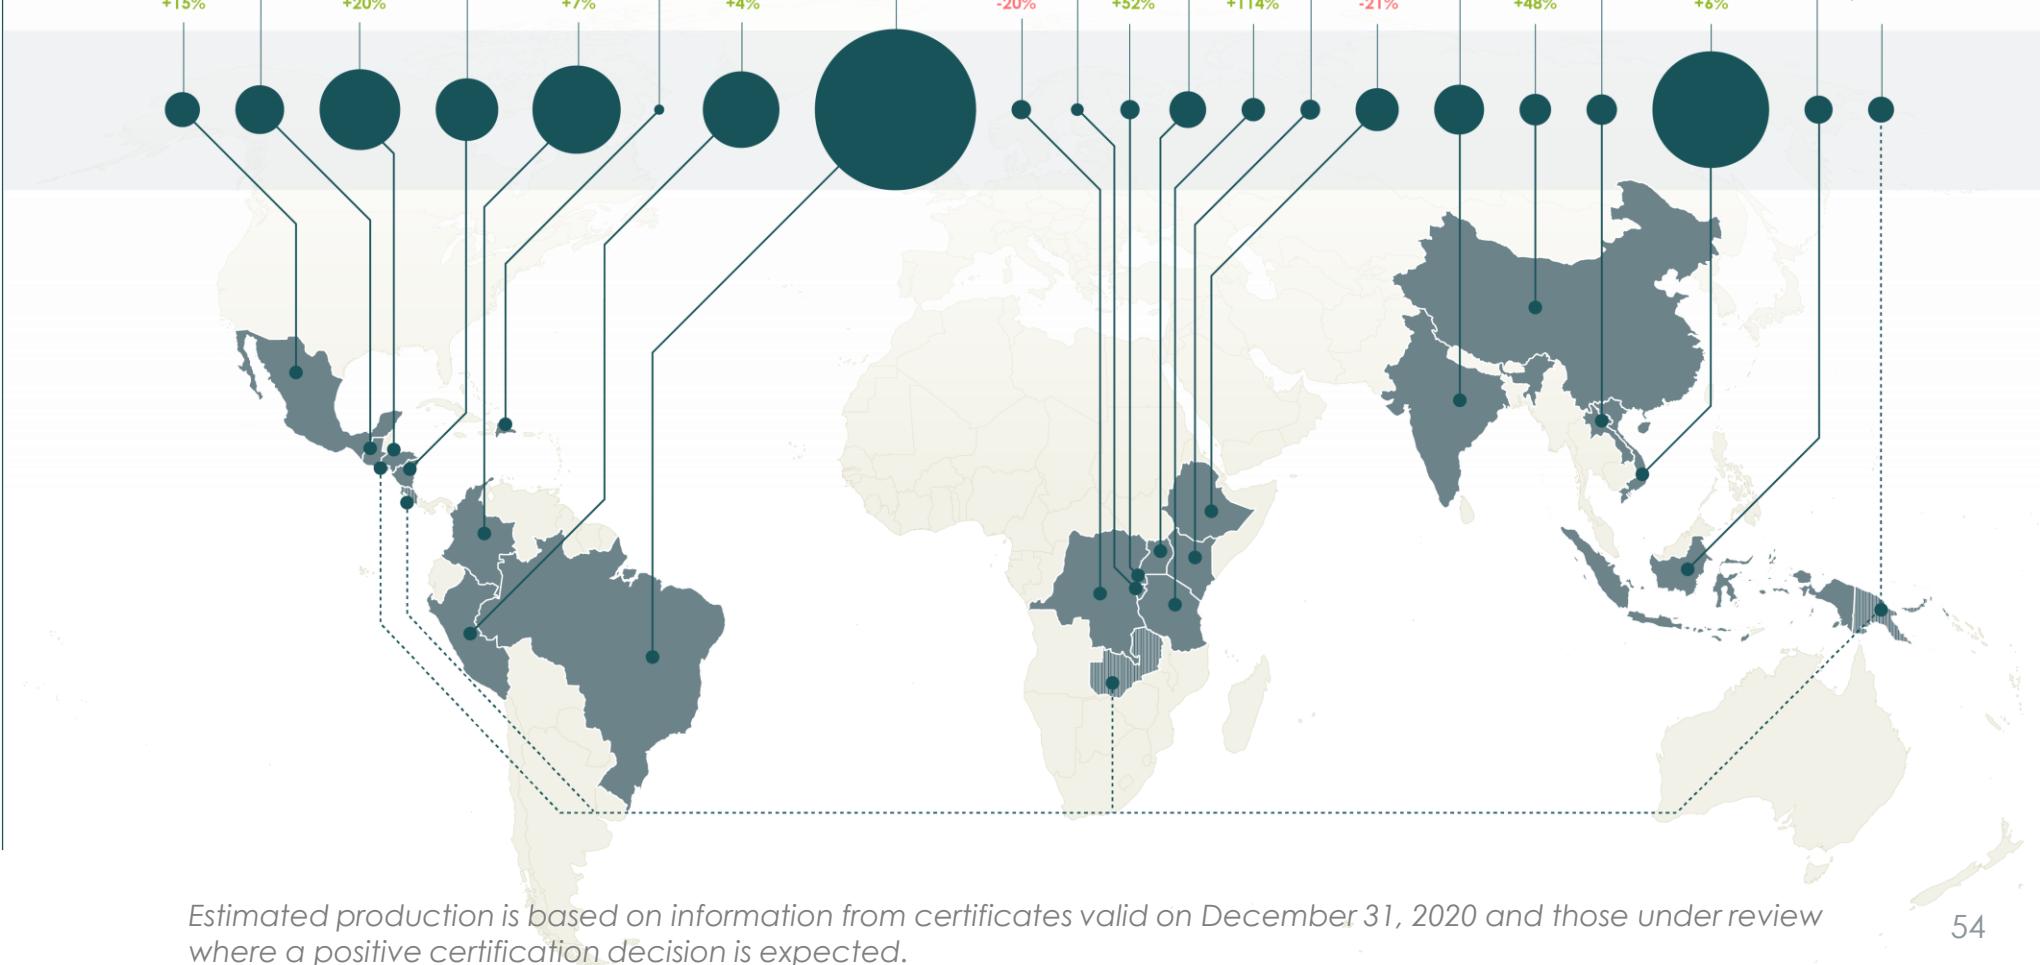

Coffee Certification Data Report 2020  
UTZ program

# Estimated production per origin

# Estimated production per origin

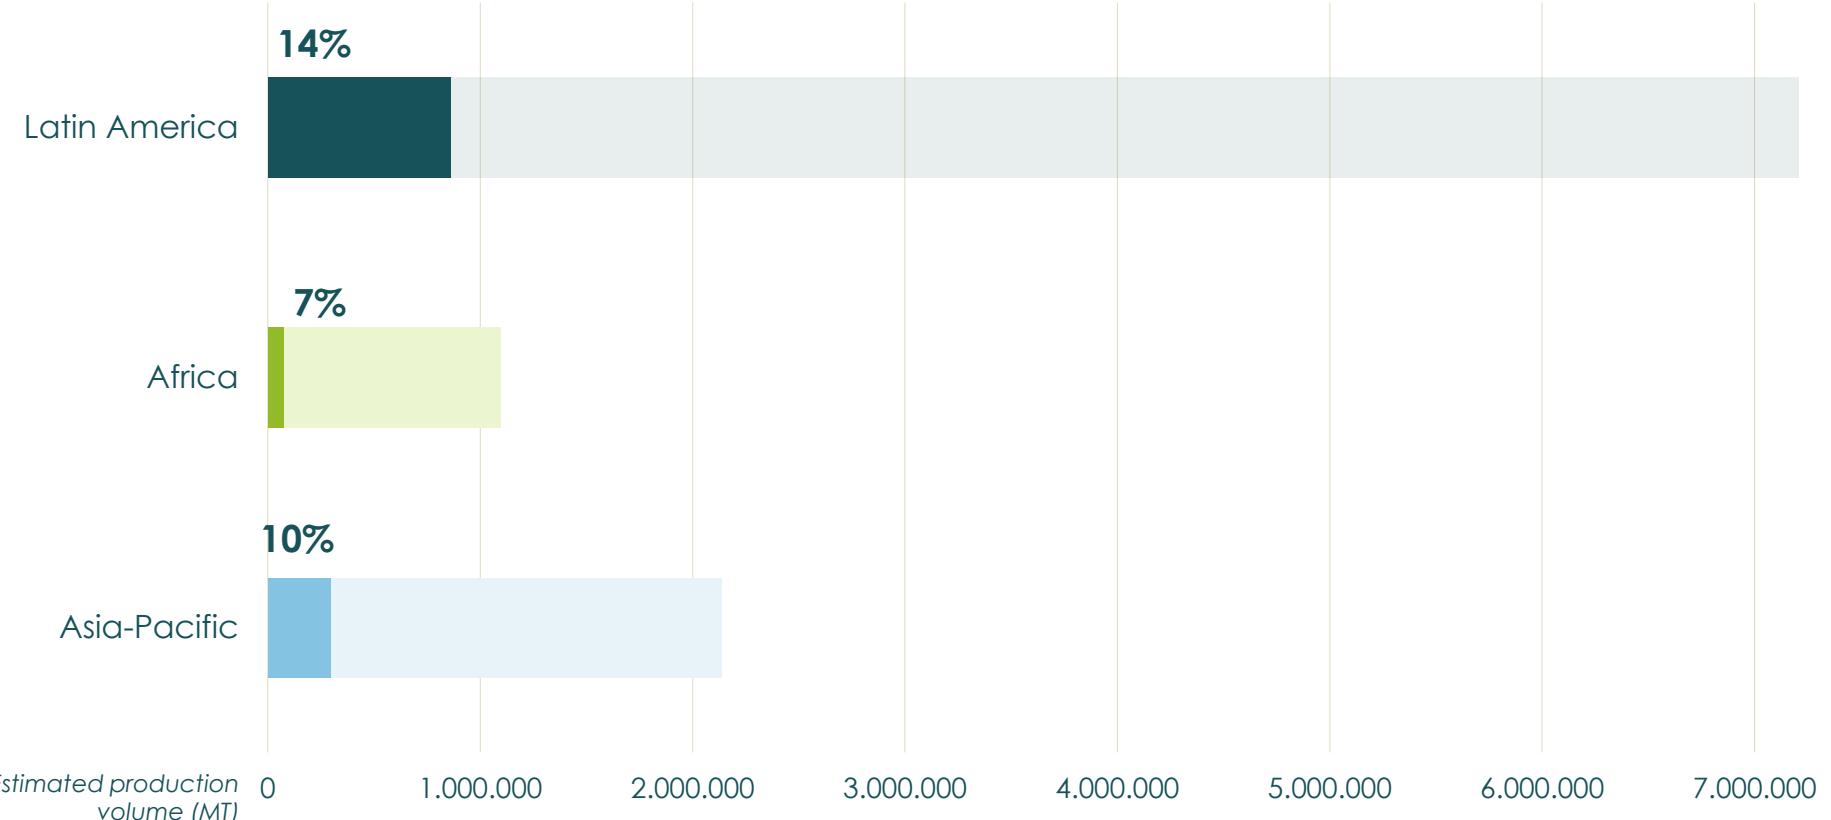

The top 3 producing countries remain the same as last year: Brazil (34% of the global production), Vietnam (18%), and Colombia (10%).

Coffee Certification Data Report 2020  
UTZ program

Estimated production is based on information from certificates valid on December 31, 2020 and those under review where a positive certification decision is expected.

# Production market share per region

In 2020, of all coffee produced globally 12% was UTZ certified.

On regional level, certified coffee from Latin America had the highest production market share.

# Supply and Demand ratio

# Supply – Demand ratio

Producers sold on average 57% of their estimated certified volume as UTZ.

The share of certified volume sold in relation to certified supply continued to increase globally.

Coffee Certification Data Report 2020  
UTZ program

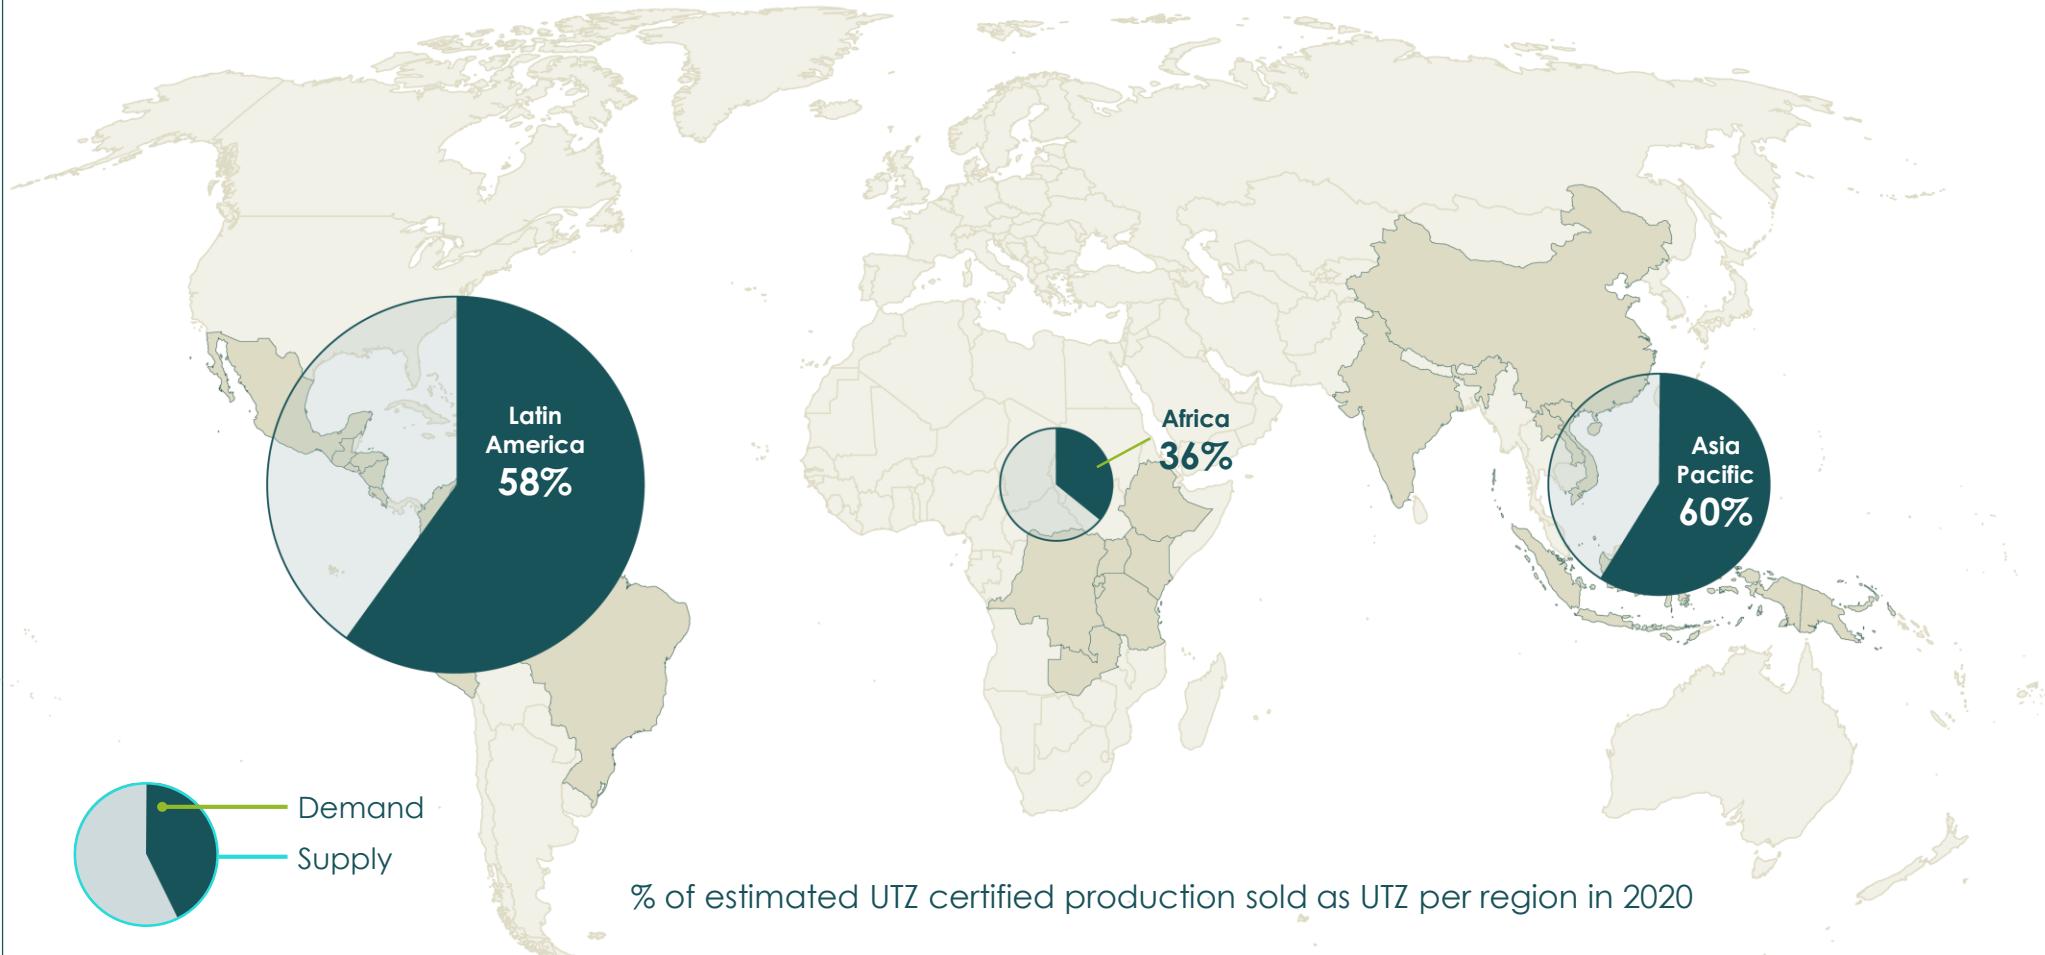

This is based on confirmed producer sales and estimated production on December 31, 2020. It indicates an estimation, not an absolute number.

# Supply – Demand per region

The global supply and demand ratio for the UTZ coffee program increased by 6% vs. 2019.

Asia Pacific has the highest share of certified sales with 60% of certified production sold as UTZ.

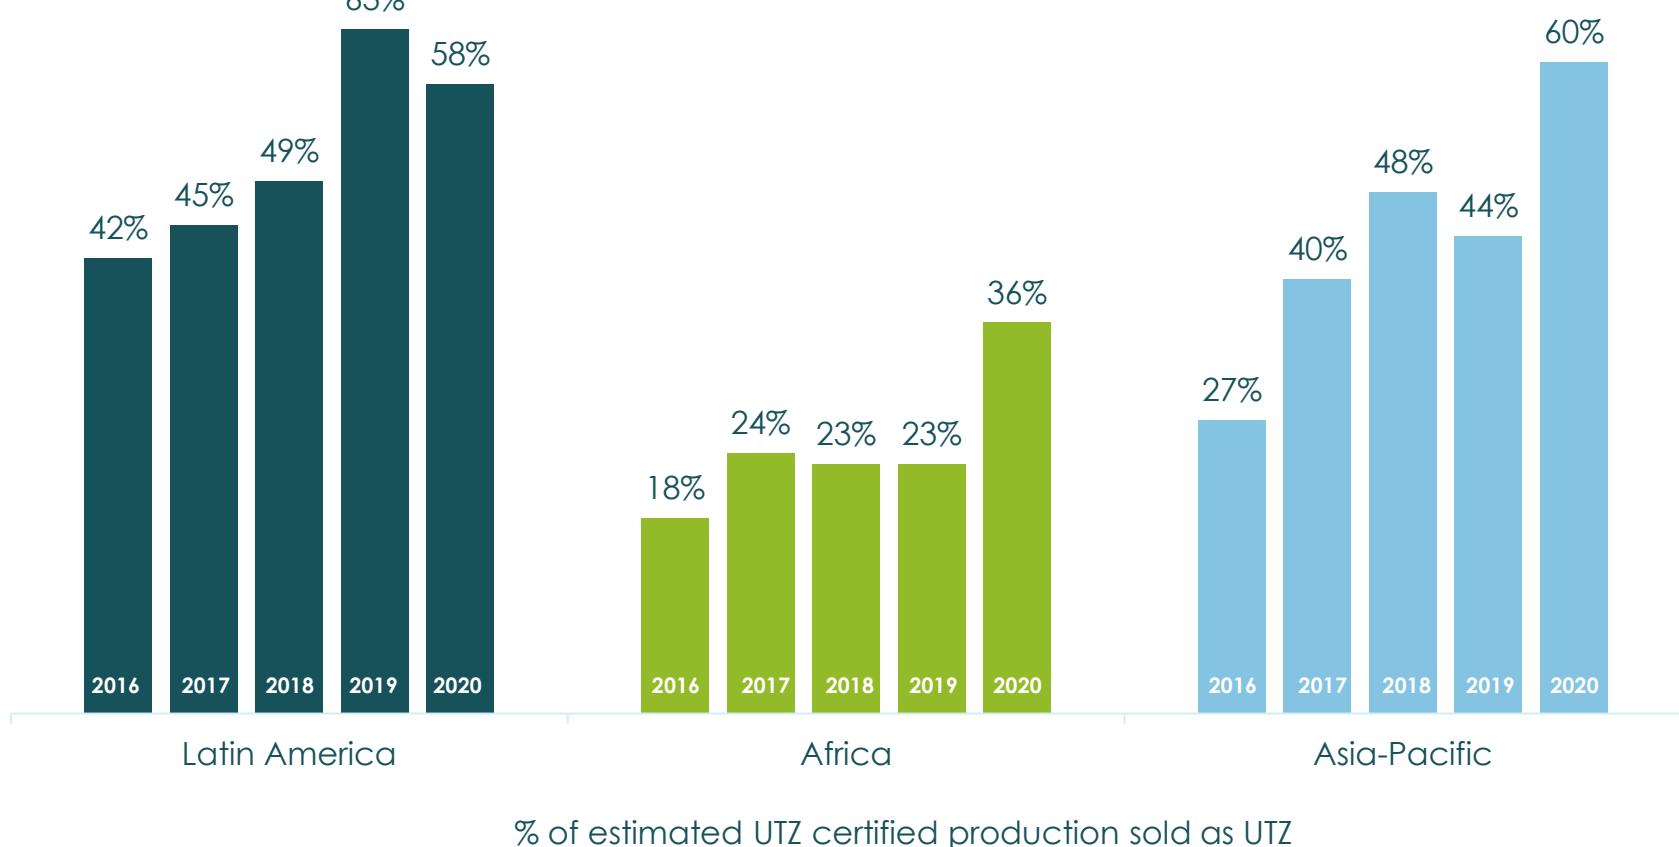

Coffee Certification Data Report 2020  
UTZ program

# Supply – Demand per region

The continued global increase in supply and demand ratio is shown for Africa and Asia Pacific. The increases are due to higher demand for certified coffee resulting in higher sales.

In Latin America the supply and demand ratio decreased for the first time in years. This can be explained by a higher increase of certified production (+19%) than sales (+12%), mainly driven by Brazil and Nicaragua.

This is based on confirmed producer sales and estimated production on December 31, 2020. It indicates an estimation, not an absolute number.

# Multi-certification

## Multi-certification

**52%**

of the UTZ producer groups and individual farms were certified for at least one other standard

Double-certification UTZ and Rainforest Alliance is the predominant combination with 60%.
